**Islam, Secularism, and Liberal Democracy** Nader Hashemi, 2009-04-02 Islam's relationship to liberal democratic politics has emerged as one of the most pressing and contentious issues in international affairs Nader Hashemi challenges the widely held belief among social scientists that religious politics and liberal democratic development are structurally incompatible While there are certainly tensions between religion and democracy the two are not irreconcilable Liberal democracy requires a form of secularism to sustain itself yet the main political cultural and intellectual resources that Muslim democrats can draw upon are religious How can this paradox be reconciled Hashemi makes three principal arguments First in societies where religion is a key marker of identity the road to liberal democracy must pass through the gates of religious politics The process of democratization therefore cannot be artificially de-linked from debates about the normative role of religion in government Secondly while liberal democracy requires secularism religious traditions are not born with an inherent secular and democratic conception of politics These ideas must be developed and in an emerging democracy how they are developed is critical Finally Hashemi argues that there is an intimate relationship between religious reformation and political development While the first often precedes the second these processes are deeply interlinked Democratization does not require a privatization of religion but it does require a reinterpretation of religious ideas that are conducive to liberal democracy By engaging in this reinterpretation religious groups can play a central role in the development and consolidation of democracy Islam Secularism and Liberal Democracy argues for a rethinking of democratic theory so that it incorporates the variable of religion in the development of liberal democracy In the process it proves that an indigenous theory of Muslim secularism is not only possible but is a necessary requirement for the advancement of liberal democracy in Muslim societies

many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion s heightened international profile Despite all this attention it is challenging to situate religion within a discipline which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel
