Religion As Belonging A General Theory Of Religion:

Religion as Belonging John S. Cumpsty, 1991-11-01 Religious studies having struggled to establish a phenomenological approach has been reluctant to go beyond observation and various interpretive strategies to theoretical explanation Insofar as it has ventured into explanation it has been heavily dependent for its theory upon those whose primary field of study is sociology anthropology or psychology This book attempts a general theory of religion on its own terms Part One lays a foundation for such a scientific study of religion A comprehensive and essential definition from which to generate a conceptual framework is sought through an examination of the nature of religious experience of religious discourse and of types of religious tradition In Part Two the consequences of the chosen theoretical understanding are unpacked into a conceptual framework and phenomena regarded as religious are located within it Religion, Theology and the Human Sciences Richard H. Roberts, 2002 Religion Theology and the Human Sciences explores the religious consequences of the so called end of history and triumph of capitalism as they have impinged upon key institutions of social reproduction in recent times The book explores the imposition of managerial modernity upon successive sectors of society and shows why many people today feel themselves to be oppressed by systems of management that seem to leave them no option but to conform Richard Roberts seeks to challenge and outflank such seamless oppressive modernity through reconfiguration of the religious and spiritual field Religion as Belonging John S. McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade s life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field s object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly

disserve but actively inhibit the emergence of critical perspectives and capacities And on the geo political scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism Transforming Encounters and Critical Reflection: African Thought, Critical Theory, and Liberation Theology in Dialogue Justin Sands, Anné Hendrik Verhoef, 2018-12-04 This book is a printed edition of the Special Issue Transforming Encounters and Critical Reflection African Thought Critical Theory and Liberation Theology in Dialogue that was published in Religions Modern Societies & the Science of Religions Gerard Wiegers, 2018-11-13 This book brings together studies by seventeen specialists in the science of religions in which they relate the changes in their discipline to the changes which have occurred in a select number of modernising societies worldwide It attempts to study these developments in their relation to and as conditioned and constrained by cultural change changes in educational systems technology population for example migration economic patterns politics and last but not least religious systems The essays focus on resp France Germany the Netherlands Spain the USA Turkey Israel Morocco Saudi Arabia South Africa Indonesia Japan and China Written in honour of Dr Lammert Leertouwer professor of History of Religions and the Comparative Study of Religions at Leiden University from 1979 until his retirement in 1997 the book is particularly important for all those who are interested in the religious social and political contexts of the academic Study of Religions in general and in the various countries dealt with in particular *The Construction of Belief* Aziz Esmail, Abdou Filali-Ansary, 2013-02-01 Mohammed Arkoun was one of the most prominent and influential Arab intellectuals of his day During a career spanning more than thirty years he was revered as an outstanding research scholar a bold critic of the theoretical tensions embedded within Islamic Studies and an outspoken public figure upholding political social and cultural modernism This Festschrift honours Arkoun AZ's scholarship bringing together the contributions of eleven distinguished scholars of history religious studies and philosophy It offers a comprehensive selection of critical engagements with Arkoun AZ's work reflecting on his considerable influence on contemporary thinking about Islam and its ideological philosophical and theological dimensions Published in association with the Aga Khan University Institute for the study of Muslim Civilisations **The Oxford Handbook of Religion and Europe** Grace Davie, Lucian Leuștean, 2022 Features contributions from leading scholars providing crucial insight into the role of religious ideas structures and institutions in the making of Europe Introduces the building blocks of Europe's religious and the part that they played in the formation of the continent Explores the relationship between religious communities and ideologies in the twentieth century connections that play out very differently in East and West Europe Examines the role of religion in the construction of the European Union from the end of the Second World War until the present day Assesses the relationship between the major world religions and the idea of Europe Book jacket

Interpreting Charles Taylor's Social Theory on Religion and Secularization Germán McKenzie, 2016-11-22 This book examines Taylorean social theory its sources main characteristics and impact Charles Taylor's meta narrative of

secularization in the West prominently contained in his major work *A Secular Age* 2007 has brought new insight on the social and cultural factors that intervened in such process the role of human agency and particularly on the contemporary conditions of belief in North America and Europe This study discusses what Taylor's approach has brought to the scholarly debate on Western secularization which has been carried on mostly in sociological terms McKenzie interprets Taylor's views in a way that offers an original social theory Such interpretation is possible with the help of sociologist Margaret Archer's morphogenetic theory and by making the most of Taylor's particular understanding of the method of the social sciences and of his philosophical views on human beings knowledge and modernity After exploring the philosophical and sociological sources informing Taylorean social theory and proposing its basic concepts and hermeneutic guidelines the author compares it with two widespread theories of secularization the now waning orthodox account and that proposed by Rational Choice Theory scholars particularly prevalent in the United States In doing so the book shows in which ways Taylorean social theory supersedes them what new issues it brings into the scholarly discussion and what difficulties might limit its future development

of Religious Research, 1992 *David Martin and the Sociology of Religion* Hans Joas, 2018-06-14 David Martin is a pioneer of a political sociology of religion that integrates a combined analysis of nationalism and political religions with the history of religion He was one of the first critics of the so called secularization thesis and his historical orientation makes him one of the few outstanding scholars who have continued the work begun by Max Weber and Emile Durkheim This collection provides the first scholarly overview of his hugely influential work and includes a chapter written by David Martin himself Starting with an introduction that contextualises David Martin's theories on the sociology of religion both currently and historically this volume aims to cover David Martin's lifework in its entirety An international panel of contributors sheds new light on his studies of particular geographical areas Britain Latin America Scandinavia and on certain systematic fields

secularization violence music Pentecostalism the relation between sociology and theology David Martin's concluding chapter addresses the critical points raised in response to his theories This book addresses one of the key figures in the development of the sociology of religion and as such it will be of great interest to all scholars of the sociology of religion Under the Spell of Freedom Hans Joas, 2024 In Under the Spell of Freedom Hans Joas deconstructs the grand Hegelian narrative of human history as the self-realization of the idea of freedom setting as a counterpart the sketches of a theory of the emergence of moral universalism He takes the classical views of Hegel and his emphasis on the role of Protestant Christianity and the extremely negative views about Christianity in the work of the philosopher Friedrich Nietzsche to elaborate on this new understanding of religion and freedom which encompasses a range of intellectual traditions and avoids Eurocentrism Joas answers the empirical question of when where why and how such a moral universalism emerged and developed British Idealism: A History W. J. Mander, 2011-05-12 W J Mander presents the first ever synoptic history of British Idealism the philosophical school which dominated English language philosophy from the 1860s through to the early years of the following century Offering detailed examination of the origins growth development and decline of this mode of thinking British Idealism A History restores to its proper place this now almost wholly forgotten period of philosophical history Through clear explanation of its characteristic concepts and doctrines and paying close attention to the published works of its philosophers the volume provides a full length history of this vital school for those wishing to fill a gap in their knowledge of the history of British Philosophy while its detailed notes and bibliography will guide the more dedicated scholar who wishes to examine further their distinctive brand of philosophy By covering all major philosophers involved in the movement not merely the most famous ones like Bradley Green McTaggart and Bosanquet but the lesser known figures like the Caird brothers Henry Jones A S Pringle Pattison and R B Haldane and by looking at all branches of philosophy not just the familiar topics of ethics political thought and metaphysics but also the less well documented work on logic religion aesthetics and the history of philosophy British Idealism A History brings out the movement's complex living pattern of unity and difference something which other more superficial accounts have tended to obscure **Circling the Elephant** John J. Thatamanil, 2020-06-02 Christian theologians have for some decades affirmed that they have no monopoly on encounters with God or ultimate reality and that other religions also have access to religious truth and transformation If that is the case the time has come for Christians not only to learn about but also from their religious neighbors Circling the Elephant affirms that the best way to be truly open to the mystery of the infinite is to move away from defensive postures of religious isolationism and self-sufficiency and to move in vulnerability and openness toward the mystery of the neighbor Employing the ancient Indian allegory of the elephant and blindfolded men John J Thatamanil argues for the integration of three often separated theological projects theologies of religious diversity the work of accounting for why there are so many different understandings of the elephant comparative theology the venture of walking over to a different side of the elephant and

constructive theology the endeavor of re describing the elephant in light of the other two tasks Circling the Elephant also offers an analysis of why we have fallen short in the past Interreligious learning has been obstructed by problematic ideas about religion and religions Thatamanil argues while also pointing out the troubling resonances between reified notions of religion and race He contests these notions and offers a new theory of the religious that makes interreligious learning both possible and desirable Christians have much to learn from their religious neighbors even about such central features of Christian theology as Christ and the Trinity This book envisions religious diversity as a promise not a problem and proposes a new theology of religious diversity that opens the door to robust interreligious learning and Christian transformation through encountering the other
