religious belief is also a common facet of those working towards peace and reconciliation. Despite the strategic importance of religion to human security in Africa, there are few contemporary publications that explore this issue on an international scale. This volume redresses that imbalance by examining religion's impact on human security across Africa. Written by an international team of contributors, this book looks in detail at the intersection of religion and security in a variety of African contexts. Case studies from a diverse set of countries including Nigeria, Ghana, South Africa, Burkina Faso, and more are used to illustrate wider trends across the continent. Acknowledging that religion can be used to incite violence as well as encourage peace, the chapters employ an interdisciplinary exploration of the ethics, sociology, and politics around these issues. This is a much-needed volume on religion's capacity to effect human security. It will therefore be of significant interest to any scholar of religious studies, African studies, political science, the sociology of religion, and anthropology, as well as peace, conflict, and reconciliation studies.

**Jewish Political Studies Review**, 2004

**The Social Significance of Religion in the Enlarged Europe** Olaf Müller, 2016-02-24

Engaging with some of the central issues in the sociology of religion, this volume investigates the role and significance of churches and religion in contemporary Western and Eastern Europe. Based on an extensive international research project, it offers case studies of various countries including Finland, Ireland, Portugal, Germany, Poland, Russia, Estonia, Hungary, and Croatia, as well as cross-country comparisons. Researching more precisely the present social relevance of church and religion at different levels, *The Social Significance of Religion in the Enlarged Europe* raises and responds to both descriptive and explanatory questions: Can we observe tendencies of religious decline in the various Western and Eastern European countries? Are we witnessing trends of religious individualization? To what extent has there been a religious upswing in the last few years? And what are the factors causing the observed processes of religious change? Marked by its broad range of data and a coherent conceptual framework in accordance with which each chapter assesses the extent to which three important theoretical approaches in the sociology of religion—secularization theory, the market model of religion, and the individualization thesis—are applicable to the data, this book will be of interest to scholars of sociology, politics, and religion exploring religious trends and attitudes in contemporary Europe.

number of Islamist terrorists The result is a crucial topic of our times how do different civilizations coexist in a small and increasingly congested planet without conflict The chapters in this book were originally published as a special issue of The Review of Faith International Affairs

**Democracy Protests** Dawn Brancati, 2016-09-08 Why do democracy protests emerge in some countries at certain times but not in others Why do governments accommodate these protests undertaking sweeping reforms in some cases and in others find ways to suppress protests In *Democracy Protests* Brancati highlights the role of economic crises in triggering protests She argues that crises increase discontent with governments and authoritarianism in particular and also increase support for opposition candidates who are more likely to organize protests especially during election periods Economic crises are also shown to create chances for opportunists to capitalize on anti regime sentiment and mobilize support against governments However if crises are severe and protests concomitantly large governments are likely to be compelled to make accommodations with protestors regardless of their likelihood of retaining office Brancati's argument rests on a rich statistical analysis of the causes and consequences of democracy protests around the globe between 1989 and 2011 combined with qualitative case studies
