**Religions as Brands** Jean-Claude Usunier, Jörg Stolz, 2016-04-01 During the twentieth century religion has gone on the market place Churches and religious groups are forced to sell god in order to be attractive to religious consumers More and more religions are seen as brands that have to be recognizable to their members and the general public What does this do to religion How do religious groups and believers react What is the consequence for society as a whole This book brings together some of the

best international specialists from marketing sociology and economics in order to answer these and similar questions The interdisciplinary book treats new developments in three fields that have hitherto evolved rather independently the commoditization of religion the link between religion and consumer behavior and the economics of religion By combining and cross fertilizing these three fields the book shows just what happens when religions become brands

*The Re-Enchantment of the West* Christopher Partridge, 2005-03-04 As a book about emergent spirituality in the contemporary West it focuses on the nature evolution and significance of new forms of religion and alternative spiritualities Part One of the book provides the theoretical background and guides the reader through some of the principal debates After an overview of the secularization thesis which argues that the West is becoming increasingly disenchanted the second chapter turns to the sociological analysis of new religions and alternative spiritualities Particular attention is given to the ideas of the sociologist of religion Ernst Troeltsch especially his enigmatic analysis of the emergence mystical religion which presciently provides helpful insights into understanding the contemporary alternative religious milieu Against sociologists such as Bryan Wilson and Steve Bruce this and the subsequent chapter argues that rather than being insignificant new forms of spirituality are actually proving to be a significant part of Western re enchantment Chapter 3 constructs a general theory of the re enchantment of the West Chris Partridge argues that Western Society is permeated by a broad occulture by which he means a reservoir of ideas beliefs theories and practices to which new religions unorthodox spiritualities film and popular music all draw attention This re enchantment of the West should not be seen as a superficial secondary development in the shadow of Christianity In many ways it is a religious phenomenon in its own right Partridge s arguments in this regard are well put and I warmly welcome this timely book Mikhael Rothstein University of Copenhagen Denmark

**Religion, Culture and Politics in the Twentieth-Century United States** Mark Hulsether,2007-05-31 Anyone who seeks to understand the dynamics of culture and politics in the United States must grapple with the importance of religion in its many diverse and contentious manifestations With conservative evangelicals forming the base of the Republican Party racial ethnic communities often organised along religious lines and social political movements on the left including major religious components many of the country s key cultural political debates are carried out through religious discourse Thus it is misleading either to think of the US as a secular society in which religion is marginal or to work with overly narrow understandings of religion which treat it as monolithically conservative or concerned primarily with otherworldly issues In this volume Mark Hulsether introduces the key players and offers a select group of case studies that explore how these players have interacted with major themes and events in US cultural history Students in American Studies and Cultural Studies will appreciate how he frames his analysis using categories such as cultural hegemony race and gender contestation popular culture and empire Key Features Provides a concise introduction to the field Balances a stress on religious diversity with attention to power conflicts within multiculturalism Dramatizes the internal complexity and dynamism of religious communities Brings religious issues into the field of cultural studies building bridges that can enable more informed and constructive discussion of religion in these fields Provides an integrated view of religion and its importance in recent US history      Not by Faith Alone Roger J.R. Levesque,2002-12-11 Teens are often seen as challenging social mores They are frequently perceived to engage in activities considered by adults to be immoral including sexual behavior

delinquent activities and low level forms of violence Yet the vast majority report surprisingly high levels of religiosity Ninety five percent of American teens aged 13 17 believe in God or a universal spirit and 76% believe that God observes their actions and rewards or punishes them Nearly half engage in religious practices such as praying alone or attending church or synagogue services Adolescents religious beliefs are clearly important to them Yet the law does not know how to approach adolescents religious rights and needs In Not by Faith Alone Roger J R Levesque argues that teens search for meaning does not always serve adolescents or society well Religious doctrines and institutions are not all good with violence linked to religious beliefs for example particularly racial ethnic and sexual orientation harassment becoming an increasing concern Not by Faith Alone is the first attempt to integrate research on the place of religion in adolescent development and to discuss the relevance of that research for policies and laws which regulate religion in their lives Levesque asks how religion broadly defined influences the development of teens inner moral compasses and how we can ensure that religion and the apparent need for religious activity lead to positive outcomes for individual adolescents and for society
