

How to Respect the Religious Quasi-Other? Methodological Considerations in Studying the Kimbanguist Doctrine of Incarnation

Mika Vähäkangas

This chapter outlines a methodology for theologically analyzing and assessing predominantly oral non-Western theologies. First, the two major existing approaches are deliberated upon, namely, the (cultural/social) anthropology of Christianity and ecumenical (systematic) theology.¹ After exploring the pros and cons of both, a brief background of the Kimbanguist Church is presented, which serves as the case for reflecting upon methodological considerations. This is followed by an attempt to integrate the useful elements of both anthropology and theology. The whole exercise is conducted with the ecumenical theological agenda in mind, and therefore does not propose any value judgment on theological and anthropological or ethnographical approaches as such.

The Kimbanguist doctrine of incarnation is used as the concrete material for methodological deliberations because of its critical situation at the moment of writing – the Kimbanguist Church is very close to becoming the first church ever to have its membership in the World Council of Churches (WCC) discontinued on doctrinal grounds. Furthermore, it is a leading African Instituted Church with a rich oral theological tradition and deep involvement in the Kongo cultural heritage.

1. Ecumenics is the activity of promoting unity between Christian churches. Ecumenical theology is an academic discipline which studies ecumenics on the one hand and churches on the other, with the aim of providing analyses for the use of the stakeholders in ecumenics. Systematic theology is a discipline that deals with the doctrinal and philosophical aspects of theology. In this chapter, ecumenical theology is approached as a systematic theological discipline thereby ignoring, e.g., its historical dimension, which comes close to church history.

Religious Quasi Religious Departments:

The Ideology of Religious Studies Timothy Fitzgerald, 2003-10-16 In recent years there has been an intensifying debate within the religious studies community about the validity of religion as an analytical category In this book Fitzgerald sides with those who argue that the concept of religion itself should be abandoned On the basis of his own research in India and Japan and through a detailed analysis of the use of religion in a wide range of scholarly texts the author maintains that the comparative study of religion is really a form of liberal ecumenical theology By pretending to be a science religion significantly distorts socio cultural analysis He suggests however that religious studies can be re represented in a way which opens up new and productive theoretical connections with anthropology and cultural and literary studies

Understanding New Religious Movements John A Saliba, 2004-09-08 Discussions of any religion can easily raise passions But arguments tend to become even more heated when the religion under discussion is characterized as new Divisions around the study of new religious movements NRMs or cults or nontraditional or alternative or emergent religions are so acute that there is even controversy over what to call them John Saliba strives to bring balance to these discussions by offering perspectives on new religions from different academic perspectives history psychology sociology law theology and counseling This approach provides rich descriptions of a broad range of movements while demonstrating how the differing aims of the disciplines can create much of the controversy around NRMs The new second edition has been updated and revised throughout and includes a new foreword by noted historian of religion J Gordon Melton For classes in religion or the social sciences or for interested individuals Understanding New Religious Movements offers the most objective introduction possible

Identifying and Regulating Religion in India Geetanjali Srikantan, 2020-10-29 Judicial debates on the regulation of religion in post colonial India have been characterised by the inability of courts to identify religion as a governable phenomenon This book investigates the identification and regulation of religion through an

intellectual history of law's creation of religion from the colonial to the post colonial Moving beyond conventional explanations on the failure of secularism and the secular state it argues that the impasse in the legal regulation of religion lies in the methodologies and frameworks used by British colonial administrators in identifying and governing religion Drawing on insights from post colonial theory and religious studies it demonstrates the role of secular legal reasoning in the background of Western intellectual history and Christian theology through an illustration of the place of worship It is a contribution to South Asian legal history and sociolegal studies analysing court archives colonial narratives and legislative documents

Conversations and Controversies in the Scientific Study of Religion, 2016-02-15 Luther H Martin and Donald Wiebe together have spent the better part of a century exploring possibilities for a scientific study of religion The following essays are a record of their conversations together and of their conversations and controversies with a number of leading scholars in religious studies that address that possibility As with any scientific endeavor knowledge advances when research assumptions and experimental designs are collegially discussed and critically assessed It is hoped that these essays might provide the occasion for scholars in the field to discuss the theoretical and methodological issues they have raised to debate and expand upon them or in the spirit of forthright scientific inquiry to refute the arguments they have made

New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches

Twentieth Century Christian Responses to Religious Pluralism David Pitman, 2016-02-17 Twentieth Century Christian Responses to Religious Pluralism begins with the recognition that the traditional three fold typology adopted by Christians in responding to other living world religions is no longer adequate and offers a much more sophisticated and developed approach This is accomplished with

particular reference to ten key Twentieth Century theologians each of whom had significant influence in the field of inter religious studies both during their lifetime and beyond The author rejects the exclusivism and triumphalism of traditional Christian approaches and argues strongly and persuasively that the future for inter religious relationships lies in what he describes as classical pluralism and in an understanding of the importance of difference for inter faith dialogue Presenting an accessible introduction to the contemporary issues and challenges facing all those engaged in the further development of inter faith relationships dialogue and partnership between the world religions Pitman argues that the future of world peace and prosperity depends on the outcome *Paul Tillich, Carl Jung and the Recovery of Religion* John P. Dourley, 2008-06-30

Is religion a positive reality in your life If not have you lost anything by forfeiting this dimension of your humanity This book compares the theology of Tillich with the psychology of Jung arguing that they were both concerned with the recovery of a valid religious sense for contemporary culture Paul Tillich Carl Jung and the Recovery of Religion explores in detail the diminution of the human spirit through the loss of its contact with its native religious depths a problem on which both spent much of their working lives and energies Both Tillich and Jung work with a naturalism that grounds all religion on processes native to the human being Tillich does this in his efforts to recover that point at which divinity and humanity coincide and from which they differentiate Jung does this by identifying the archetypal unconscious as the source of all religions now working toward a religious sentiment of more universal sympathy This book identifies the dependence of both on German mysticism as a common ancestry and concludes with a reflection on how their joint perspective might affect religious education and the relation of religion to science and technology Throughout the book John Dourley looks back to the roots of both men s ideas about mediaeval theology and Christian mysticism making it ideal reading for analysts and academics in the fields of Jungian and religious studies Missionary Education and Empire in Late Colonial India, 1860-1920 Hayden J A Bellenoit, 2015-09-30

Contributes simultaneously to both British imperial and Indian history This work demonstrates that missionary understandings and interactions with India rather than being party to imperial ideologies often diverged from metropolitan and imperial norms **The Psychology of Religion** Ralph W.
