McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade s life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute

the field's object of study in a form that is ahistorical, apolitical, fetishized and sacrosanct. As such, he charges, it has helped to create department jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match. Surveying the textbooks available for introductory courses in comparative religion, the author finds that they uniformly adopt the *sui generis* line and all that comes with it. As a result, he argues, they are not just uncritical, which helps keep them popular among the audiences for which they are intended, but badly disserve, but actively inhibit the emergence of critical perspectives and capacities. And on the geopolitical scale, he contends, the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism. *In His Own Image and Likeness* Randall

Garr, 2003-06-01 This book is about nothing less than Genesis 1 or human creation. Humanity, the author convincingly argues, is created within the Priestly tradition as a replacement of God's divine community; human creation marks the decisive moment that P's God separates himself from other gods and institutes monotheism. After discussing the references of God's self-inclusive yet plural first person speech and examining the ramifications of this speech pattern in other biblical texts, Randall Garr discusses the divine-human relationship as it is represented by carefully analysing the prepositions and nouns that characterize it. After highlighting some themes and theological concepts elaborated in Gen 1, it clearly situates the creation of humanity within the programmatic agenda of the Priestly tradition. *The Early Christian World* Philip F.

Esler, 2002-09-11 *Early Christian World* presents an exhaustive, erudite and lavishly illustrated treatment of how the small movement which formed around Jesus in Galilee became the pre-eminent religion of the ancient world. The work begins by firmly situating early Christianity within its Mediterranean social, political and religious contexts, before charting the history of the first Christian centuries. The creation and perpetuation of Christian communities through various means, including mission and monasticism, is explored, as is the everyday experience of early Christians through discussion of gender and sexuality, religious practice, communication and social structures. The intellectual, particularly theological and artistic heritage of the period is fully considered, and a vivid picture painted of the internal and external challenges faced by early Christianity. The book concludes with profiles of the most notable figures of the age. Comprehensive and accessible, *Early Christian World* provides up-to-date coverage of the most important topics in the study of early Christianity, together with an invaluable collection of visual material. It will be an indispensable resource for anyone studying this period. **Reconceptualising**

Conversion Zeba A. Crook, 2012-08-09 Die Studie nimmt die bisherige Diskussion der Konversion in der Antike neu auf, durch eine Verknüpfung von klassischen epigraphischen und biblischen Quellen mit einer sozialwissenschaftlichen Methodologie. Der Autor hinterfragt dabei die bisher vorausgesetzte psychologische Kontinuität zwischen antiken und modernen Menschen und bietet statt dessen ein Modell, welches an den Denkvoraussetzungen der Antike selbst gebildet wurde. Die griechisch-römischen und mediterranen Religionen und Philosophien, also auch das hellenistische Judentum und

das Christentum orientierten sich an den Modellen von Patronat und Loyalität Das Verständnis der antiken Konversion muss also hier ansetzen In diesem Zusammenhang wird auch die Bekehrung des Paulus neu gedeutet Studies in Hellenistic Religions Luther H. pure entities that may become mixed in encounter and lead to impure hybrid forms Syncretism in Religion presents a selection of essays committed to solving the problems of syncretism The essays reflect the full breadth of religious traditions that could be called syncretistic An overview of the historical background of syncretism is given alongside classical readings from the history of religion definitions of syncretism in relation to theories of power and an assessment of the future of the subject This volume brings together the work of authors who have made significant contributions in the field some appearing for the first time in English It will be of interest to any student or scholar of religion philosophy or anthropology concerned with the dynamics of cultural contact and change

Babylonian Ceremonial Script in Its Scholarly Context Carole Roche-Hawley, 2024-03-15 Since the advent of Assyriology in the early nineteenth century it has been known that two distinct scripts were used in ancient Mesopotamian inscriptions and documents One usefully characterized as cursive was used for the ephemeral documents of daily life as well as on most library and archival texts The other was a deliberately archaizing script reserved for ceremonial use This ceremonial script of Babylonian origin contained both archaic and archaizing signs and was in productive use for over two millennia not only in Babylonia but occasionally also in Assyria and beyond Yet to date there has been no systematic study devoted specifically to this ceremonial script nor any published syllabary of the archaic and archaizing signs it employs This volume attempts to rectify this deficiency by providing a substantive introduction to Babylonian ceremonial script along with a history of its modern study and several case studies of how the script was actually used The introduction is supplemented by an edition of the paleographic lists of the second and first millennia BCE which contain pedagogical inventories of the archaic and archaizing cuneiform signs illustrating how the ceremonial script was taught learned and transmitted in scholarly contexts

Images of Others Nathaniel Levtow, 2008-06-30 In this volume Nathaniel Levtow articulately interacts with Mesopotamian and Israelite iconoclastic traditions locating Israelite polemics against cult images among a spectrum of ancient West Asian literary genres and ritual practices that target the embodied deities of political opponents Levtow argues that Israelite parodies of Mesopotamian iconic cult were not unique expressions of aniconic monotheism but assertions of Israelite political potency during and shortly after the Babylonian Exile By interpreting Israelite icon parodies in this context Levtow rejects the idea of idolatry as a static native Israelite descriptive category and highlights the ability of Israelite writers to compose authoritative classifications of cult that profoundly influenced ancient and modern understandings of iconic worship practices He concludes that biblical representations of iconic cult reveal dynamic acts of Israelite social formation and exemplify the enduring power of the cult image in ancient West Asian societies
