Changing Faith Darren E. Sherkat, 2014-08-22 More than anywhere else in the Western world religious attachments in America are quite flexible with over 40 percent of U S citizens shifting their religious identification at least once in their lives In Changing Faith Darren E Sherkat draws on empirical data from large scale national studies to provide a comprehensive portrait of religious change and its consequences in the United States With analysis spanning across generations and ethnic groups the volume traces the evolution of the experience of Protestantism and Catholicism in the United States the dramatic growth of Hinduism Buddhism and Islam and the rise of non identification now the second most common religious affiliation in the country Drawing on that wealth of data it details the impact of religious commitments on broad arenas of American social life including family and sexuality economic well being political commitments and social values Exploring religious change among those of European heritage as well as of Eastern and Western European immigrants African Americans Asians Latin Americans and Native Americans Changing Faith not only provides a comprehensive and ethnically inclusive demographic overview of the juncture between religion and ethnicity within both the private and public sphere but also brings empirical analysis back to the sociology of religion

Religious Change and Continuity Across Generations Maria T. Brown, Christel Gärtner, Merrill Silverstein, 2024-09-23
Religious Change and Continuity Across Generations Passing on Faith in Families of Six European and North American Nations brings together scholars of religious studies secularism and family science to examine how religion is passed down the generations in six European and North American nations Taking a social change perspective within the context of family socialization theory the authors treat intergenerational change and continuity in religion and spirituality as occurring under specific national and historical conditions As such they consider the social forces that variously reinforce or inhibit transmission of religiosity across successive generations within families The volume provides a nuanced view of the role that societal context plays in religious transitions and transformations Chapters consider the strong influence of the Roman Catholic church in Italy Communist suppression of religion in Hungary aversion to religious discussions in Finland the East West Catholic Protestant divide in Germany and rapid religious deculturation in Canada and the U S Further each chapter takes a mixed methods approach using quantitative survey data to describe the strength and pattern of intergenerational transmission and interview data to clarify family dynamics by which parents and oftentimes grandparents influence the religious beliefs and practices of younger generations taking care to consider how the absence of religion is also conveyed to the next generation
