Snow, Lyn Corno, Lee Joseph Cronbach, 2002 A panel of experts and former associates completed this book after Richard E Snow's death in 1997 expanding his notes on implications of the theory for instructional design and teaching practice The panel developed Snow's ideas on where the field should go next emphasizing his promising research strategies Viewing intelligence as education's most important product and its most important raw material Snow stressed the need to consider both cognitive skills and affective motivational characteristics In this volume previously unconnected research and various theoretical ideas are integrated into a dynamic model of aptitude Understanding the transaction between person and situation was Snow's primary concern This work draws from diverse resources to construct a theoretical model of aptitude as a complex process of unfolding person situation dynamics **BOOK JACKET** Advances in Computerized Scoring of Complex Item Formats Brian E. Individual Differences and Instructed Language Learning Peter Robinson, 2002. Second language learners differ in how successfully they adapt to and profit from instruction. This book aims to show that adaptation to L2 instruction and subsequent L2 learning is a result of the interaction between learner characteristics and learning contexts. Describing and explaining these interactions is fundamentally important to theories of instructed SLA and for effective L2 pedagogy. This collection is the first to explore this important issue in contemporary task-based, immersion, and communicative pedagogic settings. In the first section, leading experts in individual differences research describe recent advances in theories of intelligence, L2 aptitude, motivation, anxiety, and emotion, and the relationship of native language abilities to L2 learning. In the second section, these theoretical insights are applied to empirical studies of individual differences, treatment interactions in classroom learning, experimental studies of the effects of focus on form and incidental learning, and studies of naturalistic versus instructed SLA.
