Family Ties and Aging Ingrid Arnet Connidis, 2010 This advanced textbook covers issues of family ties and aging broadly the goal being to provide an integrated and thorough representation of what we know from the current research Whereas books on families and aging have traditionally focused on ties to a spouse and to children and grandchildren Family Ties Aging is more extensive and more reflective of contemporary society The text includes groups and relationships that typically receive short shrift exploring such neglected populations as single divorced and childless older people and their family relationships as well as sibling relationships among the elderly live in partnerships not formalized by marriage and the kinds of family ties forged by gay and lesbian persons over the life course The book weaves the vast range of information we now have about the many facets of family relationships and aging into a critical comprehensive and integrated whole

Stepfamilies Alan Booth, Judy Dunn, Judith F. Dunn, 2014-04-08 Stepfamilies represent an increasing number of American households and shape the upbringing of countless stepchildren Despite their prominence in society our knowledge about these families is very limited To address this deficit the editors have drawn together the work of 16 nationally known scholars to deal with four questions Marriages that create stepfamilies Why do they occur Fail Succeed How do stepfamilies function as child rearing environments How do stepfamilies function as sources of support in later life Building research and policy agendas What is needed In seeking answers to these questions the book bridges the disciplines of psychology sociology social psychology child development demography law and policy Readers will gain an understanding of the current knowledge about stepfamilies obtain an appreciation of the diverse views on a variety of stepfamily issues learn about existing and anticipated laws and policies that affect stepfamilies and acquire ideas on needed research and policy agendas Chapter authors are leading figures in psychology sociology demography human development and family law their contributions are valuable to researchers teachers and students as well as policymakers and legislatures

Senate documents ,1892 **Handbook of Marriage and the Family** Suzanne K. Steinmetz, Marvin B.

Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light

Today much of that has been changed. Gone is the concealment of the way in which life begins, gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4 *Analysing American Advice Books for Single Mothers Raising Sons* Berit Åström, 2023-02-07. Although single fathers as primary caregivers are on the rise, most single parent households in the US are headed by women. These women are a lucrative market for parenting books and most of these books are aimed at single mothers raising sons. This intersectional study analyses the way in which these advice books draw on mother-blame language, misconceptions of neuropsychological research and traditional conceptualisations of masculinity and femininity to convince the mother-readers that they are unable to raise a son to be a man. The study further connects the advice books to a cultural backlash against ideas of involved fatherhood and caring masculinity, exploring how the authors argue for a return to traditional family structures. **Remarried Family Relationships** Lawrence H. Ganong, Marilyn Coleman, 1994-05-11. This volume provides extensive coverage and the most up-to-date information available for students and scholars in social psychology, interpersonal communication, family studies, clinical psychology, counseling and gender studies. **Genealogical and Personal History of the Allegheny Valley, Pennsylvania** John Woolf Jordan, 1913. The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view. Unabashed optimism and unabashed racism pervades many entries in the 11th and provide its defining characteristics. Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained within its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten except by the historians/scholars.
