Shapiro, Valerie I. Kiselev, Eugene V. Zaitsev, 2013-04-17 This volume focuses on the human exposures and medical effects studies in the SemipalatinskJ Altai

region of Siberia that were a consequence of the radioactive fallout from nuclear test explosions that took place at the Semipalatinsk Test Site of the former Soviet Union. It contains a detailed account of a NATO Advanced Research Workshop (ARW) devoted to the subject and a selection of the papers presented. The title of the ARW was Long term Consequences of Nuclear Tests for the Environment and Population Health. Semipalatinsk Altai Case Studies. The estimated exposures to large numbers of people in the Altai lie in an important dose rate and dose domain. Hence the research reported herein provides new and unique information on the effects of radiation on humans. Also emphasized at the ARW were studies involving fallout from the Pacific Island tests of the U S A. There have been over 2300 nuclear weapon test explosions to date. More than 500 took place in the atmosphere and outer space; the remainder were underground. The atmospheric tests comprise the largest source of anthropogenic radioactivity released into the earth's atmosphere to date. The vast majority in number and yield were carried out by the former Soviet Union (FSU) and the United States. Each superpower maintained two primary test sites: one continental, primarily for small yield tests, and the other more remote for larger yield tests. For the U S A

Atmospheric Nuclear Tests Charles S. Shapiro, 2013-06-29. Radionuclides produced by past nuclear weapon test explosions comprise the largest source of anthropogenic radioactivity released into the earth's atmosphere to date. This volume presents data and models about the fate of the released radionuclides and their possible effects on human health. It is divided into the following three parts: Source Term Studies, Dose Reconstruction, Ecological and Health Effects, and comprises both Western and formerly secret Soviet research studies. It illuminates past and current research.
