about history but are often relatively unfamiliar to historians including anthropology archaeology and art history Creative historians can adapt and apply the same skills they honed while studying more traditional text based documents even as they borrow methods from these fields They can think through familiar historical problems in new ways They can also deploy material culture to discover the pasts of constituencies who have left few or no traces in written records The authors of this volume contribute case studies arranged thematically in six sections that respectively address the relationship of history and material culture to cognition technology the symbolic social distinction and memory They range across time and space from Paleolithic to Punk

A Communion of Shadows Rachel McBride Lindsey, 2017-10-17 When the revolutionary technology of photography erupted in American culture in 1839 it swiftly became in the day's parlance a mania This richly illustrated book

positions vernacular photography at the center of the study of nineteenth century American religious life As an empirical tool photography captured many of the signal scenes of American life from the gold rush to the bloody battlefields of the Civil War But photographs did not simply display neutral records of people places and things rather commonplace photographs became inscribed with spiritual meaning disclosing not merely signifying a power that lay beyond Rachel McBride Lindsey demonstrates that what people beheld when they looked at a photograph had as much to do with what lay outside the frame theological expectations for example as with what the camera had recorded Whether studio portraits tucked into Bibles postmortem portraits with locks of hair attached spirit photography stereographs of the Holy Land or magic lanterns used in biblical instruction photographs were curated beheld displayed and valued as physical artifacts that functioned both as relics and as icons of religious practice Lindsey s interpretation of vernacular as an analytic introduces a way to consider anew the cultural social and material reach of religion A multimedia collaboration with MAVCOR Center for the Study of Material Visual Cultures of Religion at Yale University
