Remembering Pe We:

Remembering Donald G. MacKay, 2019 This book summarizes the results of a revolution in the scientific understanding of memory mind and brain that began in 1953 when a twenty seven year old man underwent brain surgery to remedy life threatening epilepsy His name was Henry Molaison but until recently the general public knew him only as H M Henry's operation inadvertently destroyed his hippocampus the brain's engine for forming new memories He suffered catastrophic memory failures for the rest of his life Henry soon became the most studied amnesiac patient in the history of the world and also the most famous Dr MacKay worked with Henry for fifty years This book focuses primarily on the lessons of the still ongoing revolution that Henry inspired for readers wishing to maintain the everyday functioning of their memory mind and brain The research done with Henry has shown how to keep memory sharp at any age and acquire ways to offset the degradation that aging and infrequent use inflict on memory It has also given scientists insights into the different types of memory for example memories of events facts skills words and visual experiences and the likelihood of forgetting each type of memory Finally it has revealed the profound importance of memory memory decline impacts even such seemingly unrelated aspects of mind as the ability to plan to comprehend to detect and correct errors to appreciate humor to perceive the visual world to imagine hypothetical events and to create novel ideas Written in an accessible style this engaging narrative combines personal vignettes into Henry's life with important new findings about memory and brain functions

We Remember Maynooth Salvador Ryan, John-Paul Sheridan, 2020-12-19 Founded in 1795 Maynooth College has a singular place in the history of the Irish Church and indeed the Catholic Church globally Its beginning was as a small seminary of thirty students and ten professors most of whom were fleeing the ravages of the French Revolution It has been the subject of riots in the streets of London and has played host to kings and popes Its buildings have created one of the loveliest of university campuses and its chapel is among the highest free standing structures in Ireland It expanded rapidly becoming a Pontifical University a constituent college of the National University of Ireland and at one time the largest seminary in world It has educated many thousands of students and led the way in many branches of the arts and sciences But beyond that for its large number of alumni found across all sectors of society internationally it is a tapestry of rich memories This book is a contribution to this rich tapestry It is a compilation of pen pictures personal reminiscences and sketches on aspects of the college's life and history The contributors have all been associated with Maynooth in many different spheres either as students or staff and in many cases both Some have offered images of their time at Maynooth others portraits of characters and personalities they encountered there These pages are part history part folk history part aide me mmoire For some it will be an introduction to a place they have heard about but never known For others it will be a reminder of their time in the college evoking memories of their own story and the stories of those who journeyed with them For everyone it will open up this historic center of learning and tell the tales of those who walked its Pugin designed buildings Remembering

The Diachrony of Differential Object Marking in Romanian Virginia Hill, Alexandru Mardale, 2021-06-15 This book provides a comprehensive investigation of the origins development and stabilization of differential object marking DOM in Romanian DOM a means by which a grammar distinguishes between objects based on semantic features such as animacy or definiteness has been a fruitful area of research in syntax historical linguistics and typology In this volume Virginia Hill and Alexandru Mardale demonstrate that Romanian DOM reflects a typological mix of Balkan and Romance patterns and is in fact composed of three distinct mechanisms Their analysis of these mechanisms reveals that DOM triggers in Romanian are located in the nominal domain in contrast to languages such as Spanish where they are located in the verbal domain The cross linguistic perspective adopted in the volume sheds light on existing typologies of DOM particularly in relation to the variation observed in the merging location of the DOM particle and of the doubling pronominal clitic

Prospective Memory Matthias Kliegel, Mark A. McDaniel, Gilles O. Einstein, 2007-10-16 Over the last decade the topic of prospective memory the encoding storage and delayed retrieval of intended actions has attracted much interest and this is reflected in a rapidly growing body of literature 350 scientific articles have been published on this topic since the appearance of the first edited book in 1996 In addition to the quantitative

Basic and Applied Memory Research Douglas J. Herrmann, Cathy McEvoy, Chris Hertzog, Paula Hertel, Marcia K. Johnson, 2014-02-04 Basic researchers unlock the secrets of nature applied researchers unlock the means by which those secrets of nature can change people's lives Neither basic nor applied research has an independent impact These volumes examine the convergence of basic and applied research in the field of memory Volume 1 Theory and Context focuses on the methods for understanding and applying basic memory theory while Volume 2 Practical Applications expands the

understanding of practical memory research by providing in depth research examples and findings If the science of memory is to make a significant contribution to society coordinating our basic and applied efforts and determining how they complement each other become of paramount importance These volumes will help in this regard both as textbooks demonstrating how to investigate memory and apply basic memory theory and as reference sources leading to a better understanding of certain problems in basic and applied memory research Readers of these volumes will gain a thorough grasp of the way major themes relate to basic and applied research collaboration how programmatic basic and applied research can be conducted on particular memory problems and the manner in which basic and applied work in major problem areas has been incorporated into the field of memory Both volumes present important information that will be indispensable to researchers and students alike
