Dismantling Contemporary Deficit Thinking Richard R. Valencia, 2010-09-13 Deficit thinking is a pseudoscience founded on racial and

class bias It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning Dismantling Contemporary Deficit Thinking provides comprehensive critiques and anti deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking Dismantling Contemporary Deficit Thinking examines the ongoing social construction of deficit thinking in three aspects of current discourse the genetic pathology model the culture of poverty model and the at risk model in which poor students students of color and their families are pathologized and marginalized Richard R Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation s public schools Valencia also discusses a number of proactive anti deficit thinking suggestions from the fields of teacher education educational leadership and educational ethnography that are intended to provide a more equitable and democratic schooling for all students

Interplay of Creativity and Giftedness in Science Melissa K. Demetrikopoulos, John L. Pecore, 2015-12-17 This book explores education for juvenile offenders in relation to

Passages Academy which is both similar to and representative of many school programs in juvenile correctional facilities. Examining the mission and population of this school contributes to an understanding of the ways in which the teachers think about and ultimately act with respect to their detained juveniles students and particularly illustrates how the tension between punishment and rehabilitation is played out in school policies and design. By calling attention to the decisions that surround juvenile detention education, the extant research concentrates on three main areas: first, the social, political, and pedagogical forces that determine who enters the juvenile justice systems; second, how these court-involved youths are educated while they are in the system; and third, the practical problems and the social justice issues youths encountered when transitioning back to their community schools.

I Hope I Don't See You Tomorrow is both heartwarming and heartbreaking. Its vast empathy for the students that L. A. Gabay teaches is edifying, while its unsparing examination of the forces that push youth into detention is soul shearing. Gabay is at once Tocqueville and Kozol; he brilliantly guides us through the educational territory that is foreign to most of us, even as he paints a searing portrait of teachers who shape lesson plans for students who must learn under impossible conditions. Gabay's haunting and eloquent missive from the front lines of pain and possibility couldn't be more timely as the nation's first black president seeks to lessen the stigma of nonviolent ex-offenders in our society. Gabay's book confronts the criminal justice system at its institutional roots in the economic misery and racial strife of schooling that compounds the suffering of poor youth as they are contained by a state that often only pays attention to them when they are in trouble. Gabay opens eyes and vexes minds with this stirring and sober account of what it means to teach those whom society has deemed utterly expendable.

Michael Eric Dyson, author of *The Black Presidency*, Barack Obama and the Politics of Race in America. As a beneficiary of Lee Gabay and his colleague's patience, discipline, and compassionate teaching at the school, this timely book beautifully decrypts the pedagogical framework within the juvenile justice system. As America comes to term with its zeal for incarceration, policymakers, educators, government officials, parents, and advocates should take advantage of this carefully written book and use it as reflection and pause as we prepare our young court-involved students towards adulthood.

Jim St. Germain, Advisory Counsel on President Obama's Taskforce on Police-Community Relations and Mayor Bloomberg's Close to Home initiative.

Managing Diversity T. Elon Dancy, 2010. This book brings together scholars who explore the evolving meanings of diversity and how these meanings present new challenges and considerations for collegiate leadership, management, and practice. The book offers empirical, scholarly, and personal space to interrogate the seemingly elusive but compelling challenges postsecondary institutions face in managing diversity. Book chapters are offered in a variety of voices: some detailing theoretical, conceptual, sociohistorical, and globalized meanings of diversity; some highlighting college personnel narratives around social justice and equity; and some illustrating identity politics and provocative topics among students, faculty, and staff that continue to present formidable challenges to collegiate equity agendas. The intent is to both question existing efforts to diversify and make inclusive collegiate contexts to present

new frameworks of thinking about diversity equity and inclusion and to identify and detail policy and practice implications

The Brain and Strengths Based School Leadership Sheryl G. Feinstein, Robert W. Kiner, 2011-06 The authors connect current cognitive research with the challenges of educational leadership outline four leadership styles and demonstrate how to capitalize on your strengths
