The Worlds of Christopher Columbus William D. Phillips, Carla Rahn Phillips, 1992 When Columbus was born in the mid fifteenth century Europe was largely isolated from the rest of the Old World Africa and Asia and ignorant of the existence of the world of the Western Hemisphere The voyages of Christopher Columbus opened a period of European exploration and empire building that breached the boundaries of those isolated worlds and changed the course of human history This book describes the life and times of Christopher Columbus on the 500th anniversary of his first voyage across the Atlantic Ocean in 1492 Since ancient times Europeans had dreamed of discovering new routes to the untold riches of Asia and the Far East what set Columbus apart from these explorers was his single minded dedication to finding official support to make that dream a reality More than a simple description of the man this new book places Columbus in a very broad context of European and world history Columbus s story is not just the story of one man s rise and fall Seen in its broader context his life becomes a prism reflecting the broad range of human experience for the past five hundred years Respected historians of medieval Spain and early America the authors examine Columbus s quest for funds first in Portugal and then in Spain where he finally won royal backing for his scheme Through his successful voyage in 1492 and three subsequent journeys to the new world Columbus reached the pinnacle of fame and wealth and yet he eventually lost royal support through his own failings William and Carla Rahn Phillips discuss the reasons for this fall and describe the empire created by the Spaniards in the lands across the ocean even though neither they nor anyone else in Europe knew precisely where or what those lands were In examining the birth of a new world this book reveals much about the times that produced

these intrepid explorers **The Post-Historical Middle Ages** E. Scala, 2009-05-25 This collection of original essays repositions medieval literary studies after an era of historicism Analyzing the legacy of Marxist and materialist theory on medieval literary criticism the collection offers new ways of reading texts historically Drawing upon aesthetic ethical and cultural vantage points and methods these essays demonstrate that a variety of approaches and theories are historical and can change what it means to historicize medieval literature By defining our post historical moment in medieval English literary studies in terms of new possibilities this collection will have broad appeal to those interested in the English Middle Ages history culture and reading itself *The Invention of Scarcity* Deborah Valenze, 2023-01-01 A radical new reading of eighteenth century British theorist Thomas Robert Malthus which recovers diverse ideas about subsistence production and environments later eclipsed by classical economics With the publication of *Essay on the Principle of Population* and its projection of food shortages in the face of ballooning populations British theorist Thomas Robert Malthus secured a leading role in modern political and economic thought In this startling new interpretation Deborah Valenze reveals how canonical readings of Malthus fail to acknowledge his narrow understanding of what constitutes food production Valenze returns to the eighteenth century contexts that generated his arguments showing how Malthus mobilized a redemptive narrative of British historical development and dismissed the varied ways that people adapted to the challenges of subsistence needs She uses history anthropology food studies and animal studies to redirect our attention to the margins of Malthus's essay where activities such as hunting gathering herding and gardening were rendered extraneous She demonstrates how Malthus's omissions and his subsequent canonization provided a rationale for colonial imposition of British agricultural models regardless of environmental diversity By broadening our conception of human livelihoods Valenze suggests pathways to resistance against the hegemony of Malthusian political economy *The Invention of Scarcity* invites us to imagine a world where monoculture is in retreat and the margins are recentered as spaces of experimentation nimbleness and human flourishing **Global Transformations** M. Trouillot, 2016-04-30 Through an examination of such disciplinary keywords and their silences as the West modernity globalization the state culture and the field this book aims to explore the future of anthropology in the Twenty first century by examining its past its origins and its conditions of possibility alongside the history of the North Atlantic world and the production of the West In this significant book Trouillot challenges contemporary anthropologists to question dominant narratives of globalization and to radically rethink the utility of the concept of culture the emphasis upon fieldwork as the central methodology of the discipline and the relationship between anthropologists and the people whom they study *Social Thought in England, 1480-1730* A.L. Beier, 2016-02-05 Authorities ranging from philosophers to politicians nowadays question the existence of concepts of society whether in the present or the past This book argues that social concepts most definitely existed in late medieval and early modern England laying the foundations for modern models of society The book analyzes social paradigms and how they changed in the period A pervasive medieval

model was the body social which imagined a society of three estates the clergy the nobility and the commonalty conjoined by interdependent functions arranged in static hierarchies based upon birth and rejecting wealth and championing poverty Another model the book describes as social humanist that fundamentally questioned the body social advancing merit over birth mobility over stasis and wealth over poverty The theory of the body social was vigorously articulated between the 1480s and the 1550s Parts of the old metaphor actually survived beyond 1550 but alternative models of social humanist thought challenged the body concept in the period advancing a novel paradigm of merit mobility and wealth The book s methodology focuses on the intellectual context of a variety of contemporary texts The Printing Press as an Agent of Change Elizabeth L. Eisenstein, 1980-09-30 Originally published in two volumes in 1980 The Printing Press as an Agent of Change is now issued in a paperback edition containing both volumes The work is a full scale historical treatment of the advent of printing and its importance as an agent of change Professor Eisenstein begins by examining the general implications of the shift from script to print and goes on to examine its part in three of the major movements of early modern times the Renaissance the Reformation and the rise of modern science
