**Food and Knowledge in Renaissance Italy** Deborah L Krohn,2016-04-15 Though Bartolomeo Scappi's Opera 1570 the first illustrated cookbook is well known to historians of food up to now there has been no study of its illustrations unique in printed books through the early seventeenth century In Food and Knowledge in Renaissance Italy Krohn both treats the illustrations in Scappi's cookbook as visual evidence for a lost material reality and through the illustrations including several newly discovered hand colored examples connects Scappi's Opera with other types of late Renaissance illustrated books What emerges from both of these approaches is a new way of thinking about the place of cookbooks in the history of knowledge Krohn argues that with the increasing professionalization of many skills and trades Scappi was at the vanguard of a new way of looking not just at the kitchen as workshop or laboratory but at the ways in which artisanal knowledge was visualized and disseminated by a range of craftsmen from engineers to architects The recipes in Scappi's Opera belong on the one hand to a genre of cookery books household manuals and courtesy books that was well established by the middle of the sixteenth century but the illustrations suggest connections to an entirely different and emergent world of knowledge It is through study of the illustrations that these connections are discerned explained and interpreted As one of the most important cookbooks for early modern Europe the time is ripe for a focused study of Scappi's Opera in the various contexts in which Krohn frames it book history antiquarianism and visual studies

*Locations of Knowledge in Medieval and Early Modern Europe* Kocku von Stuckrad,2010-03-08 One characteristic of European history of religion is a two fold pluralism a pluralism of religious identities on the one hand and a pluralism of various societal systems that interact with religious systems on the other Addressing discourses of perfect knowledge in Western culture between 1200 and 1800 this book integrates the study of Western esotericism in a larger analytical framework of European history of religion Viewed from a structuralist perspective esoteric discourse provides an analytical framework that helps to reveal genealogies of modern identities in a pluralistic competition of knowledge Experiential philosophy kabbalah astrology Hermeticism philology and early modern science are linked to knowledge claims that shaped the way in which Western culture defined itself

Tinkler,2020-05-10 This book first published in 1985 is a comprehensive guide to the main ideas in the history of geomorphology It traces the development of thinking on landforms with material ranging from the ancient world to the present day The main areas covered are the Renaissance the explosive growth of the Natural Sciences in the nineteenth century and the impact of the Second World War The papers and theories of specialists like James Hutton John Playfair and W M Davies are presented and discussed and the final chapters reflect on future change based on the past and speculation on possible developments Balance is maintained between the dual importance and dominance of English and North American contributions to the subject and quite substantial research was undertaken to provide a more complete approach to some areas hitherto neglected      **The Ricker Library** Nathaniel Cortlandt Curtis,1920      **The Studio** ,1913      **Minor Knowledge and Microhistory** Sigurdur Gylfi Magnusson,David Olafsson,2016-10-04 This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries Using the abundance of handwritten material produced disseminated and consumed some centuries after the advent of print as its research material the book's focus is on its day to day usage and on minor knowledge i e text matter originating and rooted primarily in the everyday life of the peasantry The focus is on the history of education and communication in a global perspective Rather than engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men      *The Open Shelf* ,1911      *The Borderlands Journal* ,1982      **The Future of the Book**

Geoffrey Nunberg, 1996-12-19 The death of the book has been duly announced and with it the end of brick and mortar libraries traditional publishers linear narrative authorship and disciplinarity along with the emergence of a more equitable discursive order These essays suggest that it won't be that simple While the contributors to this volume are enthusiastic about the possibilities created by digital technologies they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric reading and the nature of discourse itself
