The Renaissance, Its Nature and Origins George Clarke Sellery, 1950      The Renaissance, Its Nature and Origins , 1969

**The Cambridge Bibliography of English Literature** Frederick Wilse Bateson, 1940      **The New Cambridge**

**Bibliography of English Literature: Volume 1, 600-1660** George Watson, Ian Roy Willison, 1974-08-29 More than fifty specialists have contributed to this new edition of volume 1 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries      *The Renaissance* G. C. Sellery, 1950      *The Cambridge History of Philosophy of the Scientific Revolution* David Marshall Miller, Dana Jalobeanu, 2022-01-06 A collection of cutting edge scholarship on the close interaction of philosophy with science at the birth of the modern age      **Ancient Models in the Early Modern Republican Imagination** , 2017-10-02 Ancient Models in the Early Modern Republican Imagination edited by Wyger Velema and Arthur Weststeijn approaches the early modern republican political imagination from a fresh perspective While most scholars agree on the importance of the classical world to early modern republican theorists its role is all too often described in rather abstract and general terms such as classical republicanism or the neo roman theory of free states The contributions to this volume propose a different approach and all focus on the specific ways in which ancient republics such as Rome Athens Sparta and the Hebrew Republic served as models for early modern republican thought The result is a novel interpretation of the impact of antiquity on early modern republicanism      **Visualizing Medieval Medicine and Natural History, 1200-1550** Jean Ann Givens, Karen Reeds, Alain Touwaide, 2006-01-01 Visualizing Medieval Medicine and Natural History 1200 1550 addresses fundamental questions about the interplay of visual and verbal communication in medieval medicine pharmacy and natural history Analyzing images in works as diverse as herbals jewellery surgery manuals lay health guides cinquecento paintings manuscripts of Pliny s Natural History and Leonardo s notebooks the essays ask What counts as medical illustration in the Middle Ages What purposes and audiences do these illustrations serve How do images of natural objects observed phenomena and theoretical concepts amplify texts and convey complex cultural attitudes Why do we regard some of these images as medieval productions while other exactly contemporary images strike us as typically early modern in character      *Catalog* University of South Dakota, 1895      The New Map of the World Giuseppe Mazzotta, 2014-07-14 For today s readers the great Italian philosopher of history Giambattista Vico 1668 1744 can be startlingly relevant to the social and educational divisiveness we confront at century s end here Giuseppe Mazzotta one of the leading Italianists in the United States shows how much Vico properly read can bring to an understanding of contemporary

social problems To explore Vico's body of thought in all its monumental complexity Mazzotta highlights the place of poetry or writerliness in Vico's educational project which links literature history religion philosophy and politics The New Map of the World is the first book since Benedetto Croce's The Philosophy of G B Vico 1911 to interpret the immense range of Vico's creativity Beginning with Vico's autobiography Mazzotta explains that Vico's heroic attempt to unite the arts and sciences was meant to offer a desperately needed political unity to modern society In contrast to past thematic studies of Vico that focus on a single one of his ideas The New Map of the World explores the vital interaction of the issues that fascinated him his educational and political project his sense of the necessity for a new way of conceiving authority and his belief in the power of poetry Mazzotta ends by examining Vico's awareness of the tragic limits of politics itself Originally published in 1999 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Bloomsbury Companion to Marx Andrew Pendakis, Imre Szeman, Jeff Diamanti, 2018-12-27 There are very few figures in history that have exerted as much and as varied an influence as Karl Marx His work represents an unrivalled intervention into fields as various as philosophy journalism economics history politics and cultural criticism His name is invoked across the political spectrum in connection to revolution and insurrection social justice and economic transformation The Bloomsbury Companion to Marx is the definitive reference guide to Marx's life and work Written by an international team of leading Marx scholars the book offers comprehensive coverage of Marx's life and contexts sources influences and encounters key writings major themes and topics and reception and influence The defining feature of this Companion is its attention to the new directions in Marxism that animate the theoretical scientific and political sides of Marx's thought Gender and the growing importance of Marxist feminism is treated as equally important to clarifying Marx today as traditional and diverse categories of critique such as class capital and mode of production Similarly this Companion showcases the methodological and political importance of Marxism to environmentalist politics Finally the volume examines in detail non European Marxisms demonstrating the centrality of Marxist thought to political movements both within and beyond the global north This book is the ideal research resource for anyone working on Marx and his ideas today and as an entry point if you are approaching Marx's thought for the first time

**The Will to Power** Friedrich Nietzsche, 2017-01-26 This world is the will to power and nothing besides One of the great minds of modernity Friedrich Nietzsche smashed through the beliefs of his age These writings which did much to establish his reputation as a philosopher offer some of his most powerful and troubling thoughts on how the values of a new aggressive elite will save a nihilistic mediocre Europe and most famously on the will to power ideas that were seized upon and twisted by later readers Taken

from Nietzsche's unpublished notebooks and assembled by his sister after his death *The Will to Power* now appears with previous errors corrected Translated by R Kevin Hill and Michael A Scarpitti with an Introduction and Notes by R Kevin Hill

**Tasting French Terroir** Thomas Parker, 2015-05 This book explores the origins and significance of the French concept of terroir demonstrating that the way the French eat their food and drink their wine today derives from a cultural mythology that developed between the Renaissance and the Revolution Through close readings and an examination of little known texts from diverse disciplines Thomas Parker traces terroir's evolution providing insight into how gastronomic mores were linked to aesthetics in language horticulture and painting and how the French used the power of place to define the natural world explain comportment and frame France as a nation

**Origins, Imitation, Conventions** James S. Ackerman, 2024-03-19 Twelve studies by eminent art historian James S Ackerman This collection contains studies written by art historian James Ackerman over the past decade Whereas Ackerman's earlier work assumed a development of the arts as they responded to social economic political and cultural change his recent work reflects the poststructural critique of the presumption of progress that characterized Renaissance and modernist history and criticism In this book he explores the tension between the authority of the past which may act not only as a restraint but as a challenge and stimulus and the potentially liberating gift of invention He examines the ways in which artists and writers on art have related to ancestors and to established modes of representation as well as to contemporary experiences The origins studied here include the earliest art history and criticism the beginnings of architectural drawing in the Middle Ages and Renaissance Leonardo Da Vinci's sketches for churches the first in the Renaissance to propose supporting domes on sculpted walls and piers and the first architectural photographs Imitation refers to artistic achievements that in part depended on the imitation of forms established in practices outside the fine arts such as ancient Roman rhetoric and print media Conventions like language facilitate communication between the artist and viewer but are both more universal understood across cultures and more fixed resisting variation that might diminish their clarity The three categories are closely linked throughout the book as most acts of representation partake to some degree of all three
