Renaissance Civic Humanism:

Renaissance Civic Humanism James Hankins, 2000 Civic humanism has been one of the most influential of all concepts in the history of ideas In this volume an eminent team of political theorists and historians of ideas have been brought together to reassess the impact on the subject of the pioneering work of Hans Baron 1966 and J G A Pocock 1975 creating a fresh intellectual landscape in which Renaissance civic humanism can be discussed Drawing on a wide range of political and historical texts this book evaluates civic humanism in the light of the emergence of oligarchy imperialism patronage politics and the Medici ascendancy in Florence in the 14th to 16th centuries It proposes new understandings of the evolution of important republican concepts such as liberty the rule of law virtue and the common good This thought provoking collection represents a significant contribution to the study of republican political ideology in the Renaissance and modern periods

The Crisis of the Early Italian Renaissance Hans Baron, 1966-03-21 Hans Baron was one of the many great German migrant scholars whose work Princeton brought into the Anglo American world His *Crisis of the Early Italian Renaissance* has provoked more discussion and inspired more research than any other twentieth century study of the Italian Renaissance Baron's book was the first historical synthesis of politics and humanism at that momentous critical juncture when Italy passed from medievalism to the thought of the Renaissance Baron unlike his peers married culture and politics he contended that to truly understand the Renaissance one must understand the rise of humanism within the political context of the day This marked a significant departure for the field and one that changed the direction of Renaissance studies Moreover Baron's book was one of the first major attempts of any sort to ground intellectual history in a fully realized historical context and thus stands at the very origins of the interdisciplinary approach that is now the core of Renaissance studies Baron's analysis of the forces that changed life and thought in fifteenth century Italy was widely reviewed domestically and internationally and scholars quickly noted that the book will henceforth be the starting point for any general discussion of the early Renaissance The Times Literary Supplement called it a model of the kind of intensive study on which all understanding of cultural process must rest First published in 1955 in two volumes the work was reissued in a one volume Princeton edition in 1966

Peter Adamson explores the rich intellectual history of the Byzantine Empire and the Italian Renaissance. Peter Adamson presents an engaging and wide ranging introduction to the thinkers and movements of two great intellectual cultures: Byzantium and the Italian Renaissance. First he traces the development of philosophy in the Eastern Christian world from such early figures as John of Damascus in the eighth century to the late Byzantine scholars of the fifteenth century. He introduces major figures like Michael Psellos, Anna Komnene and Gregory Palamas and examines the philosophical significance of such cultural phenomena as iconoclasm and conceptions of gender. We discover the little known traditions of philosophy in Syriac, Armenian and Georgian. These chapters also explore the scientific, political and historical literature of Byzantium. There is a close connection to the second half of the book since thinkers of the Greek East helped to spark the humanist movement in Italy. Adamson tells the story of the rebirth of philosophy in Italy in the fifteenth and sixteenth centuries. We encounter such famous names as Christine de Pizan, Niccol Machiavelli, Giordano Bruno and Galileo, but as always in this book series such major figures are read alongside contemporaries who are not so well known, including such fascinating figures as Lorenzo Valla, Girolamo Savonarola and Bernardino Telesio. Major historical themes include the humanist engagement with ancient literature, the emergence of women humanists, the flowering of Republican government in Renaissance Italy, the continuation of Aristotelian and scholastic philosophy alongside humanism, and breakthroughs in science. All areas of philosophy from theories of economics and aesthetics to accounts of the human mind are featured. This is the sixth volume of Adamson's *History of Philosophy Without Any Gaps*, taking us to the threshold of the early modern era.

In Search of Florentine Civic Humanism, Volume 2 Hans Baron, 2019-04-23

Hans Baron's *Crisis of the Early Italian Renaissance* is widely considered one of the most important works in Italian Renaissance studies. Princeton University Press published this seminal book in 1955. Now the Press makes available a two volume collection of eighteen of Professor Baron's essays, most of them thoroughly revised, unpublished or presented in English for the first time. Spanning the larger part of his career, they provide a continuation of and complement to the earlier book. The essays demonstrate that contemporaneously with the revolution in art, modern humanistic thought developed in the city state climate of early Renaissance Florence to a far greater extent than has generally been assumed. The publication of these volumes is a major scholarly event, a reinforcement and amplification of the author's conception of civic Humanism. This book includes studies of medieval antecedents and special studies of Patristic, Leonardo Bruni and Leon Battista Alberti. It offers a thoroughly re-conceived profile of Machiavelli drawn against the background of civic Humanism, as well as essays presenting evidence that French and English Humanism of the sixteenth

and seventeenth centuries was closely tied to Italian civic thought of the fifteenth century. The work culminates in a reassessment of Jacob Burckhardt's pioneering thought of the Renaissance. Hans Baron is Distinguished Research Fellow Emeritus Newberry Library. Originally published in 1988, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

De Republica: Civic Humanism in Renaissance Milan (and Other Renaissance Signories), 2005 *Images and Identity in Fifteenth-century Florence* Patricia Lee Rubin, 2007-01-01

An exploration of ways of looking in Renaissance Florence where works of art were part of a complex process of social exchange. Renaissance Florence of endless fascination for the beauty of its art and architecture is no less intriguing for its dynamic political, economic and social life. In this book Patricia Lee Rubin crosses the boundaries of all these areas to arrive at an original and comprehensive view of the place of images in Florentine society. The author asks an array of questions: Why were works of art made? Who were the artists who made them and who commissioned them? How did they look and how were they looked at? She demonstrates that the answers to such questions illuminate the contexts in which works of art were created and how they were valued and viewed. Rubin seeks out the meeting places of meaning in churches, in palaces, in piazzas, places of exchange where identities were taken on and transformed, often with the mediation of images. She concentrates on questions of vision and visibility on seeing and being seen. With a blend of exceptional illustrations, close analyses of sacred and secular paintings by artists including Fra Angelico, Fra Filippo Lippi, Filippino Lippi and Botticelli, and wide-ranging bibliographic essays, the book shines new light on fifteenth-century Florence, a special place that made beauty one of its defining features.

Humanism and Creativity in the Renaissance, 2006-02-01. This volume comprises original contributions from 17 scholars whose work and careers Ronald Witt has touched in myriad ways. Intellectual, social and political historians, a historian of philosophy and an art historian, specialists in various temporal and geographical regions of the Renaissance world, here address specific topics reflecting some of the major themes that have woven their way through Ronald Witt's intellectual cursus. While some essays offer fresh readings of canonical texts and explore previously unnoticed lines of filiation, among them others present discoveries including a hitherto lost text and overlooked manuscripts that are here edited for the first time. Engagement with little-known material reflects another of Witt's distinguishing characteristics: a passion for original sources. The essays are gathered under three rubrics: 1. Politics and the Revival of Antiquity; 2. Humanism, Religion and Moral Philosophy; and 3. Erudition and Innovation. Contributors include Robert Black, Melissa Meriam Bullard, Christopher S. Celenza, Anthony F. D. Elia, Charles Fantazzi, Kenneth Gouwens, Anthony Grafton, Paul F. Grendler, James Hankins, John M. Headley, Mark Jurdjevic, Timothy Kircher, David A. Lines, Edward P. Mahoney, John Monfasani, Louise Rice, and T. C. Price.
