## **Renaissance In National Context:**

**The Renaissance in National Context** Roy Porter, Mikulas Teich, 1992 The Renaissance in National Context aims to dispel the commonly held view that the great efflorescence of art learning and culture in the period from c 1350 to 1550 was solely or even primarily an Italian phenomenon These essays address the development of art literacy and humanism across the length and breadth of Europe showing that the Renaissance had many sources independent of Italy meeting numerous local needs and serving diverse local functions specific to the political economic social and religious climates of various regions and principalities The authors show that though the Renaissance was in a fashion backward looking recovering the culture of antiquity it nevertheless served as the springboard for many specifically modern developments including the rise of diplomacy education printing nationalism and the new science *The Renaissance in national context* Roy Porter, 1992

**The Scientific Revolution in National Context** Roy Porter, 1992-09-25 The scientific revolution of the sixteenth and seventeenth century continues to command attention in historical debate Controversy still rages about the extent to which it was essentially a revolution of the mind or how far it must also be explained by wider considerations In this volume leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton Distinct political religious cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity Questions of institutional development and of the transmission of scientific ideas are also addressed The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution
