Rendez Vous:

Rendezvous with the Sensuous John Murungi, 2014-03-17 In *Rendezvous with the Sensuous* readers are drawn to and become situated within the dynamic place of the aesthetic experience. While there human sensuousness comes into relief as it combines with the sensuousness that derives from nature. In this complex place where artistic expression coalesces with the natural world readers are extended an invitation to share in the journey of a richly diverse synesthetic experience and to gain a greater appreciation of the important place of the sensuous in illuminating the role of aesthetics in the world of ideas.

Understanding Alain Robbe-Grillet Roch C. Smith, 2000 Transforming bewilderment into understanding and pleasure while preserving a sense of Robbe Grillet's considerable richness and complexity. Smith elucidates the defining elements of the writer's fictional world: characters that barely exist, changeable narrators, plots that defy logic, notoriously meticulous descriptions that never quite form a complete story. Smith examines Robbe Grillet's embrace of discontinuity, circularity, indeterminacy, and linguistic play. Smith also poses questions about how we should view this perplexing writer as an author of hyperobjective novels and short stories, a subjective novelist, a realist, or a writer who undermines the narrative's claim to represent reality. In addition, Smith evaluates the sado-erotic imagery of Robbe Grillet's middle and late novels as a metaphorical play with textual and social conventions.

BOOK JACKET **Passion to Dance** James Neufeld, 2011-10-23 This is the story of the National Ballet of Canada: the people, the determination, and how at sixty it is still creating new work while still representing the classics. *Passion to Dance* is the story of the National Ballet of Canada: the people who dreamt the company into existence, the determination needed to keep it afloat, the bumps on the road to its success, and above all its passion for dance as a living, evolving art form. From catch-as-catch-can beginnings, borrowed quarters, tiny stages, enormous dreams, the National Ballet has emerged as one of North America's foremost dance troupes. The company at sixty is a company of its time, engaged in creating challenging new work yet committed to maintaining the classics of the past, favourites like *Swan Lake*, *The Nutcracker*, and *The Sleeping Beauty*. One hundred and fifty photographs from the company's archives illustrate this definitive history, filled with eyewitness accounts, backstage glimpses, and fascinating detail. This is a record of one of Canada's boldest cultural experiments, a book to enjoy now and keep forever. [The Rendezvous](#)

The Theory of Search Games and Rendezvous Steve Alpern,Shmuel Gal,2006-04-10 Search Theory is one of the original disciplines within the field of Operations Research It deals with the problem faced by a Searcher who wishes to minimize the time required to find a hidden object or target The Searcher chooses a path in the search space and finds the target when he is sufficiently close to it Traditionally the target is assumed to have no motives of its own regarding when it is found it is simply stationary and hidden according to a known distribution e g oil or its motion is determined stochastically by known rules e g a fox in a forest The problems dealt with in this book assume on the contrary that the target is an independent player of equal status to the Searcher who cares about when he is found We consider two possible motives of the target and divide the book accordingly Book I considers the zero sum game that results when the target here called the Hider does not want to be found Such problems have been called Search Games with the ze sum qualifier understood Book II considers the opposite motive of the target namely that he wants to be found In this case the Searcher and the Hider can be thought of as a team of agents simply called Player I and Player II with identical aims and the coordination problem they jointly face is called the Rendezvous Search Problem

Hornby, 1962 **Flocking and Rendezvous in Distributed Robotics** Bruce A. Francis, Manfredi Maggiore, 2015-10-24
This brief describes the coordinated control of groups of robots using only sensory input and no direct external commands
Furthermore each robot employs the same local strategy i e there are no leaders and the text also deals with decentralized
control allowing for cases in which no single robot can sense all the others One can get intuition for the problem from the
natural world for example flocking birds How do they achieve and maintain their flying formation Recognizing their
importance as the most basic coordination tasks for mobile robot networks the brief details flocking and rendezvous They are
shown to be physical illustrations of emergent behaviors with global consensus arising from local interactions The authors
extend the consideration of these fundamental ideas to describe their operation in flying robots and prompt readers to
pursue further research in the field Flocking and Rendezvous in Distributed Robotics will provide graduate students a firm
grounding in the subject while also offering an authoritative reference work for more experienced workers seeking a brief
but thorough treatment of an area that has rapidly gained in interest **The Law Reports** John Scott, Henry
Bompas, Edmund Lumley, Great Britain. Court of Common Pleas, 1872
