Sarah Teasley, 2022-05-06 A revealing look at Japanese design weaving together the stories of people who shaped Japan's design industries with social history economic conditions and geopolitics From cars to cameras design from Japan is ubiquitous So are perceptions of Japanese design from calming carefully crafted minimalism to avant garde catwalk fashion or the cute Kawaii aesthetic populating Tokyo streets But these portrayals overlook the creativity generosity and sheer hard work that has gone into creating and maintaining design industries in Japan In *Designing Modern Japan* Sarah Teasley deftly weaves together the personal stories of people who shaped and shape Japan's design industries with social history economic conditions and geopolitics Key to her account is how design has been a strategy to help communities thrive during turbulent times and for making life better along the way Deeply researched and superbly illustrated *Designing Modern Japan* appeals to a wide audience for Japanese design history and culture *Beyond Utopia* Agnes Nyilas, 2018-05-25 Megastructure

proposals by the Japanese Metabolism group are commonly identified with the concept of utopia Beyond this partial understanding Agnes Nyilas suggests that rather than being merely utopian the Megastructure of Metabolism represents a uniquely amalgam genre the myth camouflaged as utopia Although its Megastructure seemingly describes a desirable future condition as utopia does it also comprises certain cultural images rooted in the collective unconscious of Japanese people in accordance with the general interpretation of myth The primary narrative of *Beyond Utopia* thus follows the gradual unfolding of the myth like characteristics of its Megastructure Myth is dealt here as an interdisciplinary subject in line with contemporary myth theories After expounding the mechanism underlying the growing demand for a new myth in architecture the origin of the myth Part I discovers the formal characteristics of the Megastructure of Metabolism to give a hint of the real intention behind it Based on this Part II is a reexamination of their design methods which aims to clarify the function of the

myth and to suggest the meaning behind it Finally Part III deals with the subject matter of the myth by disclosing the meaning unfolding in the story and suggests a new reading of Metabolism urban theory as an attempt to reconsider the traditional Japanese space concept Operative Landscapes Alissa North,2013-02-01 There are infinite ways to build a community yet the defining feature of any community is characteristically the landscape Whether it is a park a river corridor community gardens a plaza or a streetscape the public spaces where people interact provide a shared sense of ownership and the qualities of these spaces influence how the communities evolve In a systematic overview following the workflow sequence of open space projects the book explores the various types and levels of intervention from masterplanning to guerilla gardening and from land reclamation to building in existing fabric Case studies mostly from North America Europe and Asia accompany the introductory essays The emphasis is on strategies of interaction between landscape projects building development and urban planning resulting in neighborhoods and city quarters that offer a higher quality of life Beyond trendy theories on landscape urbanism or landscape infrastructure this book offers an unideological view on the pragmatic potentials of landscape design for enhancing the built environment New Hotel Architecture ,1993
