Salmon Doubts:

Salmon Doubts Adam Sacks, 2004 Follows a group of salmon as they make their way to the ocean to fatten up and then return to their stream to spawn *Philosophy of Language and Webs of Information* Heimir Geirsson, 2013-03-05 The nature of propositions and the cognitive value of names have been the focal point of philosophy of language for the last few decades The advocates of the causal reference theory have favored the view that the semantic contents of proper names are their referents However Frege's puzzle about the different cognitive value of coreferential names has made this identification seem impossible Geirsson provides a detailed overview of the debate to date and then develops a novel account that explains our reluctance even when we know about the relevant identity to substitute coreferential names in both simple sentences and belief contexts while nevertheless accepting the view that the semantic content of names is their referents The account focuses on subjects organizing information in webs a name can then access and elicit information from a given web Geirsson proceeds to extend the account of information to non-referring names but they have long provided a serious challenge to the causal reference theorist Has Semantics Rested on a Mistake? And Other Essays Howard K. Wettstein, 1991 The nature of reference or the relation of a word to the object to which it refers has been perhaps the dominant concern of twentieth century analytic philosophy Extremely influential arguments by Gottlob Frege around the turn of the century convinced the large majority of philosophers that the meaning of a word must be distinguished from its referent the former only providing some kind of direction for reaching the latter In the last twenty years this Fregean orthodoxy has been vigorously challenged by those who argue that certain important kinds of words at least refer directly without need of an intermediate meaning or sense The essays in this volume record how a long term study of Frege has persuaded the author that Frege's pivotal distinction between sense and reference and his attendant philosophical views about language and thought are unsatisfactory Frege's perspective he argues imposes a distinctive way of thinking about semantics specifically about the centrality of cognitive significance puzzles for semantics Freed from Frege's perspective we will no longer find it natural to think about semantics in this way Fish Without a Doubt Rick Moonen, Roy Finamore, 2008 An guide to cooking with fish introduces more than 250 recipes that encompass all the techniques of fish and seafood cookery for appetizers soups and salads pastas and main courses **The 101 Best Graphic Novels** Stephen Weiner, 2005 Provides a concise guide to the best graphic novels that are currently in print and available written by an enthusiast and expert in this popular field Great Britain. Reports on Fisheries Question , 1918 **Notes and Queries** , 1922 **Causation and Explanation** Stathis Psillos, 2014-12-18 What is the nature of causation How is causation linked with explanation And can there be an adequate theory of explanation These questions and many others are addressed in this unified and rigorous examination of the philosophical problems surrounding causation laws and explanation Part 1 of this book explores Hume's views on causation theories of singular causation and counterfactual and mechanistic approaches Part 2 considers the regularity view

of laws and laws as relations among universals as well as recent alternative approaches to laws Part 3 examines the issues arising from deductive nomological explanation statistical explanation the explanation of laws and the metaphysics of explanation Accessible to readers of all levels this book provides an excellent introduction to one of the most enduring problems of philosophy **The London Quarterly Review** ,1863 Notes and Queries: A Medium of Inter-Communication for Literary Men, Artists, Antiquaries, Genealogists, Etc ,1852 *The Scots Revised Reports* Norman Macpherson,1904
