Landscape and Nature in Scandinavian Art MaryClaire Pappas, Tonje Haugland Sørensen, 2025-04-16 This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history

Why Conserve Nature? Stephen Trudgill, 2022-02-24

How we view nature transforms the world around us. People rehearse stories about nature which make sense to them. If we ask the question why conserve nature and the answers are based on myths, then are these good myths to have? Scientific knowledge about the environment is fundamental to ideas about how nature works. It is essential to the conservation endeavour. However, any conservation motivation is nested within a society's meanings of nature and the way society values it. Given the therapeutic and psychological significance of nature for us and our culture, this book considers the meanings derived from the poetic and emotional attachment to a sense of place, which is arguably just as important as scientific evidence. The functional significance of species is important, but so too is the therapeutic value of nature together with the historic and spiritual meanings entwined in a human feeling for landscape and wildlife.
