Loon Henry S. N.

Anderson, Raymond Pierotti, 2022-10-12 This book examines ways of conserving managing and interacting with plant and animal resources by Native American cultural groups of the Pacific Coast of North America from Alaska to California These practices helped them maintain and restore ecological balance for thousands of years Building upon the authors and others previous works the book brings in perspectives from ethnography and marine evolutionary ecology The core of the book consists of Native American testimony myths tales speeches and other texts which are treated from an ecological viewpoint The focus on animals and in depth research on stories especially early recordings of texts set this book apart The book is divided into two parts covering the Northwest Coast and California It then follows the division in lifestyle between groups dependent largely on fish and largely on seed crops It discusses how the survival of these cultures functions in the contemporary world as First Nations demand recognition and restoration of their ancestral rights and resource management practices
