An Evolutionary History of the Gangs and Factions of Rio de Janeiro Andrea Varsori,2025-09-26 The book provides a compelling and comprehensive explanation of the puzzling resilience of the gangs that have operated in Rio de Janeiro since the 1980s It offers a broad overview of the history of gangs and gang alliances factions in the whole of the

city focussing on the evolution and consistency of these groups over time positing the link between these and the groups chances of survival It draws on more than 285 articles from 15 newspapers and media outlets across a time span covering more than 40 years supplemented with interviews with high ranking public security officers and secondary data Applying a novel and composite translation of biological evolutionary concepts to a complex criminological context it focusses on three main fields of interest territory relations and internal dynamics *The post-crisis Irish voter* Michael Marsh,David M.

Farrell,Theresa Reidy,2018-08-31 This is the definitive study of the Irish general election of 2016 the most dramatic election in a generation which resulted in the worst electoral outcome for Ireland s established parties the most fractionalized party system in the history of the state and the emergence of new parties and groups These outcomes follow a pattern seen across a number of Western Europe s established democracies in which the deep crisis of the Great Recession has wreaked havoc on party systems The objective of this book is to assess this most extraordinary of Irish elections both in its Irish and wider cross national context With contributions from leading scholars on Irish elections and using a unique dataset the Irish National Election Study 2016 this volume explores voting patterns at Ireland s first post crisis election and it considers the implications for the electoral landscape and politics in Ireland Political Protest and Social Change C. Andrain,D.

Apter,1994-12-19 This book probes three issues about the linkage between political protests and social change First why do individuals participate in protest activities including nonviolent movements and revolutions How do cultural beliefs sociopolitical structures personal attitudes motives and perceptions shape the decision to participate Second why do participants choose certain tactics Protesters use different types of tactics violent vs nonviolent public vs covert organized vs spontaneous and confrontation vs accommodation with other groups political parties and government agencies Most activists view a particular tactic as a useful means to attain their policy demands Third what policy consequences emerge from the activities of protest movements The book explores the impact of protests on social change and on the distribution of political power particularly greater access of subordinate groups to government policymakers A theory of political opportunities helps explain these issues about the origins activities and outcomes of protests **Political Protest and Social Change** Charles

F. Andrain,David Ernest Apter,1995-09 At the close of the twentieth century political protests have erupted throughout the world While the collapse of communism was certainly one of the most spectacular protest related events smaller protests have become ubiquitous In Los Angeles labor activists campaign against commercial real estate owners to unionize janitors mainly Latina immigrants In the People s Republic of China peasants revolt against tax collectors Amazonian Indians protest public and economic policies that destroy their culture and rainforest habitat This book analyzes the reciprocal impact of cultural beliefs sociopolitical structures and individual behaviors on protests throughout the world Why do individuals participate in protest activities How do cultural beliefs personal attitudes and subjective perception influence the potential protester Addressing the issue of agency in protest the authors also examine why protestors enlist different tactics to achieve

their goals Why are some protests violent and others nonviolent When and why do activists conclude that it is better to accommodate than confront Finally and crucially what are the consequences of protest movements *Kashmir in Comparative Perspective* Sten Widmalm,2014-04-08 This book investigates the factors that led to the breakdown of democracy and the rise of violent separatism in Jammu and Kashmir in the 1980s and how the risk of a large scale war has grown in South Asia in the 1990s Solutions to this conflict need to be based on knowledge about what caused it as well as perspectives on why this conflict is so particularly dangerous Widmalm offers answers in this book with systematic comparisons over time to establish the causes of the conflict He refutes the contention that ethnic factors are the main cause while acknowledging that ethnic dividing lines are salient features of the conflict today Interviews with representatives of the Indian government the ISI in Pakistan and separatist leaders in Jammu and Kashmir are also incorporated Encyclopedia of the Palestinians Philip Mattar,2005 Presents the history of modern Palestine and biographies of important Palestinians

Hill,2021-05-30 This book first published in 1986 argues that there is a special category of medium powers in the world such as Britain France India Brazil Japan China and others which have sufficient military power to do something to protect their interests but which are not a match for the superpowers It surveys the whole range of naval warfare equipment operations organisation and deployment and discusses how each item should be tailored by the recognition of the position of the medium power It considers alliances a key element for medium powers and explores how these should be handled and what use they may be expected to fulfil The book argues that the concept of medium power here developed thoroughly for the first time will be extremely useful to many countries in defining their strategic role in a purposeful way Y Steve Jones,2005 Focusing on science not society maleness not manhood the book explores the point of being a man showing how the machinery works why he dies so young and how his brain differs from the rest of mankind
