State Formation in Europe, 843-1789 Sverre Bagge, 2019-06-03 State Formation in Europe 843 1789 follows the formation and development of the European state from the division of the Carolingian Empire to the French Revolution The book s primary focus is on Europe s patterns of internal and external development in comparison to political organization in other parts of the world By analysing Europe as a single unit rather than dividing it into nation states it reveals the broader historical connections within the Continent Bagge takes the reader through a discussion of how kingdoms evolved into states introducing the influence of the Church and the town on these state structures The relationship between state Church and town is traced to explain how these different power struggles played out and why the territorial state became the dominate form of organization Finally the book clarifies why Europe developed in this way and the global consequences of this development By observing Europe through the perspective of the rest of the world readers gain insight into trends common to the whole Continent while crossing the traditional border between the Middle Ages and early modern period This book is
