Field Theory, the Renormalization Group, and Critical Phenomena D. J. Amit, Victor Martin Mayor, 2005 This volume links field theory methods and concepts from particle physics with those in critical phenomena and statistical mechanics the development starting from the latter point of view Rigor and lengthy proofs are trimmed by using the phenomenological framework of graphs power counting etc and field theoretic methods with emphasis on renormalization group techniques Non perturbative methods and numerical simulations are introduced in this new edition Abundant references to research literature complement this matter of fact approach The book introduces quantum field theory to those already grounded in the concepts of statistical mechanics and advanced quantum theory with sufficient exercises in each chapter for use as a textbook in a one semester graduate course The following new chapters are included I Real Space Methods II Finite Size Scaling III Monte Carlo Methods Numerical Field Theory

Effective Field Theories Alexey A Petrov, Andrew E Blechman, 2015-11-18 This book is a broad based text intended to help the growing student body interested in constructing and applying methods of effective field theory to solve problems in their research It begins with a review of using symmetries to identify the relevant degrees of freedom in a problem and then presents a variety of methods that can be used to construct various effective theories A detailed discussion of canonical applications of effective field theory techniques with increasing complexity is given including Fermi's weak interaction heavy quark effective theory and soft collinear effective theory Applications of these techniques to study physics beyond the standard model dark matter and quantum and classical gravity are explored Although most examples come from questions in high energy physics many of the methods can also be applied in condensed matter settings Appendices include various factoids from group theory and other topics that are used throughout the text in an attempt to make the book self contained
