Arthur James Wells

Methods Of Historical Analysis In Electronic Media Leas Communication Series Leas Communication Series:

Methods of Historical Analysis in Electronic Media Donald G. Godfrey, 2006-08-15 Methods of Historical Analysis in Electronic Media provides a foundation for historical research in electronic media by addressing the literature and the methods traditional and the eclectic methods of scholarship as applied to electronic media It is about history broadcast electronic media history and history that has been broadcast and also about the historiography research written and the research yet to be written Divided into five parts this book addresses the challenges in the application of the historical methods to broadcast history reviews the various methods appropriate for electronic media research based on the nature of the object under study suggests new approaches to popular historical topics takes a broad topical look at history in broadcasting and provides a broad overview of what has been accomplished a historian s challenges and future research Intended for students and researchers in broadcast history Methods of Historical Analysis in Electronic Media provides an understanding of the qualitative methodological tools necessary for the study of electronic media history and illustrates how to find primary sources for electronic media research

Classroom Communication and Instructional Processes

Barbara Mae Gayle, Raymond W. Preiss, Nancy Burrell, Mike Allen, 2009-03-04 This volume offers a systematic review of the literature on communication education and instruction Making meta analysis findings accessible and relevant the editors of this volume approach the topic from the perspective that meta analysis serves as a useful tool for summarizing experiments and for determining how and why specific teaching and learning experiences have positive student outcomes The topics covered here are meaningful and relevant to classroom practice and each chapter offers a summary of existing quantitative social science research using meta analysis With contributions from experienced researchers throughout the communication discipline this work provides a unique analysis of research in instructional communication Taken together the chapters in this volume enhance understanding of behaviors practices and processes that promote positive student outcomes This book is a must read for scholars graduate students and researchers in communication education and will also be of interest to scholars and researchers in education

American Book Publishing Record, 2003 *Media and Communication Research Methods* Anders Hansen, David Machin, 2018-09-12 This essential textbook provides a clear and authoritative introduction to qualitative and quantitative methods for studying media and communication Written by two highly experienced researchers the book draws on a wide range of media and communication research to introduce students to the relative strengths of the different research approaches Beginning with an overview of the changing contexts and trends in media and communication research approaches the book demystifies research and the research process by offering practical and accessible guidance on how to design plan and carry out successful research projects in media and communication This is an indispensable text for all students of media and communication studies particularly those undertaking their own research projects or taking modules in research methods

The British National Bibliography Arthur James Wells, 2003

Handbook of Research on Educational Communications and Technology David H. Jonassen, 2004 This edition of this handbook updates and expands its review of the research theory issues and methodology that constitute the field of educational communications and technology Organized into seven sectors it profiles and integrates the following elements of this rapidly changing field

Understanding Media and Society in the Age of Digitalisation Dennis Nguyen, Ivonne Dekker, Sergül Nguyen, 2020-06-27 This book provides a selection of international perspectives in the interdisciplinary field of media and communications research with emphasis placed on methodological approaches and new research domains It includes critical reflections on how to conduct research on digital media culture especially concerning the potentials and limitations for mixed methods research and online research strategies as well as a series of hands on case studies These range from digital fan cultures through environmental communication news media digital politics during conflicts and crises to digital media psychology and the emerging field of medical humanities Diverse in its examples and angles the book provides a rich snippet of how media research practices are determined by practical factors and research interests

Theory, Method, and Practice in Computer Content Analysis Mark D. West, 2001-04-30 In recent years computer content analysis has undergone something of a renaissance Inexpensive and powerful desktop computers mean that computer analysis of texts is available to most researchers The availability of software to do analyses however is not always linked to clear theoretical and methodological understandings This volume seeks to deal with this concern by providing from scholars in a variety of disciplines perspectives upon the theoretical and methodological issues which arise when conducting content analysis via computer Although it is not always obvious computer content analysis is a method which inevitably calls for theoretical assumptions Those theoretical assumptions in turn drive methodological considerations and method in turn determines the form of the practice of computer content analysis This volume includes ten articles by well known scholars utilizing computer content analysis A variety of methodological theoretical and practical issues are here addressed presenting unique methods and perspectives for the consideration of computer content analysis Intended for an audience of graduate students scholars and in field practitioners Theory Method and Practice of Computer Content Analysis will serve as an invaluable resource of ideas and practices for those interested in using computers to analyze textual material

Congressional Communication in the Digital Age Jocelyn Evans, Jessica M. Hayden, 2017-07-06 Communication defines political representation At the core of the representational relationship lies the interaction between principal and agent the quality of this relationship is predicated upon the accessibility of effective channels of communication between the constituent and representative Over the past decade congressional websites have become the primary way constituents communicate with their members and a prominent place for members to communicate with constituents Yet as we move toward the third decade of the 21st century little work has systematically analyzed this forum as a distinct representational space In this book Jocelyn Evans and Jessica Hayden offer a fresh timely and mixed methods approach for understanding how

the emergence of virtual offices has changed the representational relationship between constituents and members of Congress Utilizing strong theoretical foundations a broad historical perspective elite interviews and rich original datasets Evans and Hayden present evidence that virtual offices operate as a distinct representational space and they demonstrate that their use has resulted in unprecedented and ill understood changes in representational behavior Congressional Communication in the Digital Age contributes to the scholarship on representation theory and its application to the contemporary Congress It is valuable reading for students and researchers interested in American politics political communication and legislative politics Subject Guide to Books in Print ,1997
