Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond, Mark J. Sculpher, Karl Claxton, Greg L. Stoddart, George W. Torrance, 2015 This highly successful textbook is now in its fourth edition and has been extensively updated in order to keep pace with the considerable advances in theory and practice in recent years

Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond, 2005 This highly successful textbook is now available in its third edition Over the years it has become the standard textbook in the field world wide It mirrors the huge expansion of the field of economic evaluation in health care since the last edition was published in 1997 This new edition builds on the strengths of previous editions being clearly written in a style accessible to a wide readership Key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis are then explained in more detail with special emphasis of the latest views on productivity costs the characterisation of uncertainty and the concept of net benefit The book has been greatly revised and expanded especially concerning analysing patient level data and decision analytic modelling There is discussion of new methodological approaches including cost effectiveness acceptability curves net benefit regression probabilistic sensitivity analysis and value of information analysis There is an expanded chapter on the use of economic evaluation including discussion of the use of cost effectiveness thresholds equity considerations and the transferability of economic data This new edition is required reading for anyone commissioning undertaking or using economic evaluations in health care and will be popular with health service professionals health economists pharmacists and health care decision makers It is especially relevant for those taking pharmacoeconomics courses

Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond, 1997 Since its publication in 1987 *Methods for the economic evaluation of health care programmes* has become the standard textbook in this field world wide Over the past ten years the field of economic evaluation in health care has expanded considerably with a rapid rise in the number of published studies and wider recognition of their use in health care decision making Developments in economic evaluation have also led to the publication of several guidelines for study methodology most recently those proposed by the United States Public Health Services Panel The new edition of *Methods for the economic evaluation of health care programmes* follows the same basic structure as the first edition The key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis cost analysis cost effectiveness analysis cost utility analysis and cost benefit analysis are then explained in more detail The book has been greatly revised and enlarged especially with respect to cost utility and cost benefit analysis where major methodological developments have taken place New to this edition are chapters on collecting and analysing data and presenting and using economic evaluation results The new edition will be required reading for anyone commissioning undertaking or using economic evaluations in health care and

will be popular with health service professionals health economists and health care decision makers Reviews of the first edition An important contribution to studies on the economic evaluation of medical care British Medical Journal This is essential reading Only if all managers are aware of the powers of economic techniques will they be used sensibly The Health Service Journal UK The methodological chapters on cost analysis and cost utility analysis are gems should become the standard text on the subject at the intermediate level at which it is aimed Medical Decision Making It leaves nothing important in economic evaluation analysis untouched Health Policy and Planning

Theory and Methods of Economic Evaluation of Health Care Magnus Johannesson, 1996-05-31 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost benefit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to try and provide a coherent framework within cost benefit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O'Connor and four anonymous referees provided helpful comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid
