Jeffery L. Barker, Jeffrey F. McKelvy, 1983 **Calcium Ions in Nerve Cell Function** Platon Grigor'evich Kostîuk, 1992 This
work reviews the progress that has been made in recent years in understanding the mechanisms by which calcium ions
regulate nerve cell function It covers all aspects of the topic in detail from the interaction of calcium ions with the external
surface of the plasma membrane to the function of transient changes in cytoplasmic calcium concentration Much of the book
is devoted to a discussion of the different types of receptor and voltage operated calcium channels and the basis of their
selectivity gating inactivation and pharmacological modulation The development of calcium conductance during ontogenesis
is described and the fate of calcium ions in the cell is discussed This volume clearly assesses the contribution made by the
release of calcium from internal stores to cytoplasmic calcium transients and analyses mechanisms by which this release may
be controlled The first book in the Oxford Neuroscience Series Calcium Ions in Nerve Cell Function meets the need for a
comprehensive account that draws together the enormous body of research on this important topic It will be an
indispensable to specialists in the field and will also provide an accessible review for non specialists
