Syllable Weight Matthew Gordon, 2007-05-07 The book is the first systematic exploration of a series of phonological phenomena previously thought to be unified under the rubric of syllable weight Drawing on a typological survey of 400 languages it is shown that the traditional conception that languages are internally consistent in their weight criteria across weight based processes is not corroborated by the cross linguistic survey Rather than being consistent across phenomena within individual languages weight turns out to be sensitive to the particular processes involved such that different phenomena display different distributions in weight criteria The book goes on to explore the motivations behind the process specific nature of weight showing that phonetic factors explain much of the variation in weight criteria between phenomena and also the variation in criteria between languages for a single process The book is unlike other studies in combining an extensive typological survey with detailed phonetic analysis of many languages The finding that the widely studied phenomenon of syllable weight is not a unified phenomenon contrary to the established view is a significant result for the field of theoretical phonology The book is also an important contribution to the field of phonetically driven phonology since it establishes a close link between the phonology of weight and various quantitative phonetic parameters

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose The first grammar of Amharic the national language of Ethiopia was published by Hiob Ludolf in 1698 The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material usually composed by missionaries A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* 1936 but this grammar too is not completely suited for beginners since the author's generalizations are at times aimed at linguists The grammar that comes closest to the concept of a beginner's grammar is that of C H Dawkin 1960 yet this grammar is extremely short does not give examples and does not introduce the student to the intricacies of the language The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription The illustrative examples have a free and a literal translation This procedure should likewise prove to be useful for the Semitist as well as for the general linguist

A Contrastive Metrical Analysis of Main Word Stress in English and Cairene Colloquial Arabic Mohamed Fathy Khalifa, 2017-06-20 This book analyses Cairene's interlingual errors in English main word stress following Halle and Vergnaud's 1987 metrical model and Archibald's 1998 parameter resetting The findings show the difficulty the research subjects had in stressing items with stress different from Cairene Colloquial Arabic CCA and with stress similar to CCA The book also shows that the subjects' correct stress patterns were due to parameter resetting and that English stress patterns that are both different and more marked than corresponding CCA stress patterns caused learning difficulties for the subjects
