Modernism, Space and the City Andrew Thacker, 2019-01-22 This innovative text examines the development of modernist writing in four European cities London Paris Berlin and Vienna

The History of the London Underground Map Caroline Roope, 2022-09-21 Few transportation maps can boast the pedigree that London's iconic Tube map can. Sported on t-shirts, keyrings, duvet covers and most recently downloaded an astonishing twenty million times in app form, the map remains a long-standing icon of British design and ingenuity. Hailed by the art and design community as a cultural artifact, it has also inspired other culturally important pieces of artwork and in 2006 was voted second in BBC 2's Great British Design Test. But it almost didn't make it out of the notepad it was designed in. The story of how the Underground map evolved is almost as troubled and fraught with complexities as the transport network it represents. Mapping the Underground was not for the faint-hearted; it rapidly became a source of frustration and in some cases obsession, often driving its custodians to the point of distraction. The solution, when eventually found, would not only revolutionise the movement of people around the city but change the way we visualise London forever. Caroline Roope's wonderfully researched book casts the Underground in a new light, placing the world's most famous transit network and its even more famous map in its wider historical and cultural context, revealing the people not just behind the iconic map but behind the Underground's artistic and architectural heritage. From pioneers to visionaries, disruptors to dissenters, the Underground has had them all, as well as a constant stream of often disgruntled passengers. It is thanks to the legacy of a host of reformers that the Tube and the diagram that finally provided the key to understanding it have endured as masterpieces of both engineering and design.

The Railway and Modernity Matthew Beaumont, Michael J. Freeman, 2007 Most research and writing on railway history has been undertaken in a way that disconnects it from the wider cultural milieu. Authors have been very effective at constructing specialist histories of transport but have failed to register the railway's central importance in the representation and understanding of modernity. This book brings together contributions from a range of established scholars in a variety of disciplines with the central purpose of exploring the railway less as a transport technology than as a key signifier of capitalist modernity. It examines the complex social relations in which the railway became historically embedded, identifying it as a central problematic in the cultural experience of modernity. It avoids the limitations of both the close-sighted empiricism typical of many transport historians and the long-sighted generalizations of cultural commentators who view the railway merely as a shorthand for the concept of progress over the nineteenth and twentieth centuries. The book draws on a diverse range of materials, including literary and historical forms of representation. It is also informed by a creative application of various critical theories.

Selling Places Stephen Ward, 2005-10-09 Selling Places explores the fascinating development of the place marketing and promotion over the last 150 years, drawing on examples from Northern America, Britain and continental Europe. The processes involved and the promotional imagery employed are meticulously presented and richly

London Underground David Ashford,2013-05-10 Surveying an unusually wide variety of material ranging from the Victorian triple decker novel to Modernist art and architecture to Pop music and graffiti this book suggests that the tube network is a transitional form linking the alienated spaces of Victorian England to the virtual spaces of our contemporary consumer capitalism **International Exhibitions and Urbanism** Javier Monclús,2017-05-15 International Exhibitions and Urbanism provides an insightful and comprehensive historical review of international exhibitions in its first half which is then illustrated with a thorough technical analysis of the Zaragoza 2008 project in its second half The first half offers a comparative analysis of nearly 50 events which haven taken place over the past 150 years as well as exploring the relationships with urbanism from a planning perspective Underpinned by the first hand information that the author has as one of the event's organizers the second half is devoted to the Zaragoza project for the 2008 Exposition After giving contextual historical and demographic information the Expo's master plan and building projects are then described
