The Mexican Revolution and the Limits of Agrarian Reform, 1915-1946 Dana Markiewicz, 1993 Reappraising the Mexican agrarian reform Markiewicz discredits official history and explains why an apparently radical movement produced only limited gains for the previously dispossessed peasantry *Reforming Mexico's Agrarian Reform* Laura Randall, 2016-09-16 This work provides a survey and analysis of Mexico's agrarian reform covering topics such as the agricultural provisions of NAFTA The book also discusses the events in Chiapas that are crucial to Mexico's current political situation and the implications of reform for US Mexican trade *A Companion to Mexican History and Culture* William H. Beezley, 2011-03-16 *A Companion to Mexican History and Culture* features 40 essays contributed by international scholars that incorporate ethnic gender environmental and cultural studies to reveal a richer portrait of the Mexican experience from the earliest peoples to the present Features the latest scholarship on Mexican history and culture by an array of international scholars Essays are separated into sections on the four major chronological eras Discusses recent historical interpretations with critical historiographical sources and is enriched by cultural analysis ethnic and gender studies and visual evidence The first volume to incorporate a discussion of popular music in political analysis This book is the recipient of the 2013 Michael C Meyer Special Recognition Award from the Rocky Mountain Conference on Latin American Studies **Populism in Twentieth Century Mexico** Amelia M. Kiddle, María L. O. Muñoz, 2022-07-12 Mexican presidents Lázaro Cárdenas 1934 1940 and Luis Echeverría 1970 1976 used populist politics in an effort to obtain broad based popular support for their presidential goals In spite of differences in administrative plans both aimed to close political divisions within society extend government programs to those on the margins of national life and prevent foreign ideologies and practices from disrupting domestic politics As different as they were in political style both relied on appealing to the public through mass media clothing styles and music This volume brings together twelve original essays that explore the concept of populism in twentieth century Mexico Contributors analyze the presidencies of two of the century's most clearly populist figures evaluating them against each other and in light of other Latin American and Mexican populist leaders In order to examine both positive and negative effects of populist political styles contributors also show how groups as diverse as wild yam pickers in 1970s Oaxaca and intellectuals in 1930s Mexico City had access to and affected government projects The chapters on the Echeverría presidency are written by contributors at the forefront of emerging scholarship on this topic and demonstrate new approaches to this critical period in Mexican history Through comparisons to Echeverría contributors also shed new light on the Cárdenas presidency suggesting fresh areas of investigation into the work of Mexico's quintessentially populist leader Ranging in approach from environmental history to labor history the essays in this volume present a complex picture of twentieth century populism in Mexico **Troubled Harvest** Joseph Cotter, 2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of

rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico's urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State's efforts to assist peasant farmers

Migra! Stealing Shining Rivers Molly Doane, 2012-12-01 Winner Best Social Sciences Book Latin American Studies Association Mexico Section What happens to indigenous people when their homelands are declared by well intentioned outsiders to be precious environmental habitats In this revelatory book Molly Doane describes how a rain forest in Mexico's southern state of Oaxaca was appropriated and redefined by environmentalists who initially wanted to conserve its biodiversity Her case study approach shows that good intentions are not always enough to produce results that benefit both a habitat and its many different types of inhabitants Doane begins by showing how Chimalapas translated as shining rivers has been produced in various ways over time from a worthless wasteland to a priceless asset Focusing on a series of environmental projects that operated between 1990 and 2008 she reveals that environmentalists attempted to recast agrarian disputes which actually stemmed from government supported corporate incursions into community lands and from unequal land redistribution as environmental problems Doane focuses in particular on the attempt throughout the 1990s to establish a Campesino Ecological Reserve in Chimalapas Supported by major grants from the World Wildlife Foundation

WWF this effort to foster and merge agrarian and environmental interests was ultimately unsuccessful because it was seen as politically threatening by the state. By 2000 the Mexican government had convinced the WWF to redirect its conservation monies to the state government and its agencies. The WWF eventually abandoned attempts to establish an enclosure nature reserve in the region or to gain community acceptance for conservation. Instead working from a new market based model of conservation the WWF began paying cash to individuals for environmental services such as reforestation and environmental monitoring.

Stealing Shining Rivers, 2012-12-06 In this revelatory book Molly Doane describes how Chimalapas a rainforest in Mexico's southern state of Oaxaca was appropriated and redefined by environmentalists. It demonstrates that good intentions are not always enough to produce results that benefit both a habitat and its many different types of indigenous inhabitants.

Forsaken Harvest Luis G. Cueva, 2020-11-05 This historical monograph examines the decline of the hacienda estates within Jalisco Mexico during the early decades of the twentieth century. The book also explores the impact of the land reform program of President Lázaro Cárdenas in transforming the agrarian economic structure of the region. This study contributes to an ongoing lively debate about the hacienda system and the meaning of Cárdenas's reforms. This is an important work because it explores the evolution of a regional socioeconomic system that promoted urban industrial growth at the expense of the rural poor. The model of regional development described is applicable to other areas of Mexico and underdeveloped Third World nations with extensive peasant populations. The research for this investigation has wider implications regarding issues of global hunger and malnutrition.
