Critical Marxism in Mexico Stefan Gandler, 2015-09-01 In Critical Marxism in Mexico Stefan Gandler coming from the tradition of the Frankfurt School reveals the contributions that Adolfo Sánchez Vázquez and Bolívar Echeverría have made to universal thought While in recent times Latin America has taken its distance from global power centers and reorganised its political and economic relations in philosophy the same tendency is barely visible Critical Marxism in Mexico is a contribution to the reorganisation of international philosophical discussion with Critical Theory as the point of departure Despite having studied in Europe where philosophical Eurocentrism remains virulent Gandler opens his eyes to another tradition of modernity and offers an account of the life and philosophy of Adolfo Sánchez Vázquez and Bolívar Echeverría

Sanctuaries of Earth, Stone, and Light Gloria Fraser Giffords, 2022-08-23

Over nearly three centuries Jesuit Franciscan and Dominican missionaries built a network of churches throughout the new world of New Spain. Since the early twentieth century scholars have studied the colonial architecture of southern New Spain but they have largely ignored the architecture of the north. However as this book clearly demonstrates the colonial architecture of Northern New Spain an area that encompasses most of the southwestern United States and much of northern Mexico is strikingly beautiful and rich with meaning. After more than two decades of research both in the field and in archives around the world Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed she sleuthed through historical records in several countries and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle sometimes striking influences of the religious social and artistic traditions of Europe from the beginning of the Christian era through the nineteenth century of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries and of Northern New Spain's indigenous peoples whose art influenced the designs of occupying Europeans. *Sanctuaries of Earth Stone and Light* is a pathbreaking book featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.
