Programmer's Ultimate Security DeskRef James C

Foster, 2004-11-20. The Programmer's Ultimate Security DeskRef is the only complete desk reference covering multiple languages and their inherent security issues. It will serve as the programming encyclopedia for almost every major language in use. While there are many books starting to address the broad subject of security best practices within the software development lifecycle, none has yet to address the overarching technical problems of incorrect function usage. Most books fail to draw the line from covering best practices, security principles, to actual code implementation. This book bridges that gap and covers the most popular programming languages such as Java, Perl, C, C++, and Visual Basic. Defines the programming flaws within the top 15 programming languages. Comprehensive approach means you only need this book to ensure an application's overall security. One book geared toward many languages.

InfoSec Career Hacking: Sell Your Skillz, Not Your Soul

Chris Hurley, Johnny Long, Aaron W. Bayles, Ed Brindley, 2005-06-02. InfoSec Career Hacking starts out by describing the many different InfoSec careers available, including Security Engineer, Security Analyst, Penetration Tester, Auditor, Security Administrator, Programmer, and Security Program Manager. The particular skills required by each of these jobs will be described in detail, allowing the reader to identify the most appropriate career choice for them. Next, the book describes how the reader can build his own test laboratory to further enhance his existing skills and begin to learn new skills and techniques. The authors also provide keen insight on how to develop the requisite soft skills to migrate from the hacker to corporate world. The InfoSec job market will experience explosive growth over the next five years, and many candidates for these positions will come from thriving hacker communities. Teaches these hackers how to build their own test networks to develop their skills to appeal to corporations and government agencies. Provides specific instructions for developing time management and personal skills to build a successful InfoSec career.
