Michel Foucault Subversions Of The Subject:

Michel Foucault Philip Barker, 1993 This unique and original study analyzes Foucault's interaction with the history of ideas undertaking a genealogy of the subject that subverts conventional philosophical history to develop a distinctly Foucauldian intellectual history Through a detailed account of Foucault's work and its relation to the history of ideas Philip Barker shows how that history can be usefully reconceptualised using Foucault's concepts of genealogy and archaeology Locating the emergence of self reflexive consciousness in twelfth century philosophy and elaborating upon autobiography as a philosophical persona Barker argues that this extremely productive approach can be used to analyze the relationship between the history of philosophy psychoanalysis and the transparent subject **Michel Foucault and the Games of Truth** H. Nilson, trans Rachel Clark, 2016-07-27 The book emphasises the affinity between Foucault's and Nietzsche's thought Both philosophers tried to give clarity to modernity's arbitrary nature Following on from Foucault's diagnostic enquiries into a History of Sexuality and Nietzsche's appreciation of ancient culture Nilson's study shows a practical consequence the self stylization of the individual This aesthetical attitude replaces belief in metaphysical and even scientific meaning thus leading to a philosophy of life Nilson's book targets all those who wish to give their life a unique form **The Cambridge Companion to Foucault** Gary Gutting, 2005-07-18 For Michel Foucault philosophy was a way of questioning the allegedly necessary truths that underpin the practices and institutions of modern society He carried this out in a series of deeply original and strikingly controversial studies on the origins of modern medical and social scientific disciplines These studies have raised fundamental questions about the nature of human knowledge and its relation to power structures and have become major topics of discussion throughout the humanities and social sciences The essays in this volume provide a comprehensive overview of Foucault's major themes and texts from his early work on madness through his history of sexuality Special attention is also paid to thinkers and movements from Kant through current feminist theory that are particularly important for understanding his work and its impact This revised edition contains five new essays and revisions of many others and the extensive bibliography has been updated **Foucault and Social Dialogue** Chris Falzon, 2006-06-19 Foucault and Social Dialogue Beyond Fragmentation is a compelling yet extremely clear investigation of these options and offers a new way forward Christopher Falzon argues that the proper alternative to foundationalism is not fragmentation but dialogue and that such a dialogical picture can be found in the work of Michel Foucault Such a reading of Foucault allows us to see for the first time the ethical and political position implicit in Foucault's work and how his work contributes to the larger debate concerning the death of man **Foucault, Christianity and Interfaith Dialogue** Henrique Pinto, 2020-11-25 Foucault Christianity and Interfaith Dialogue develops a new model for interfaith dialogue using the work of the French historian of ideas Michel Foucault The author argues that it is the injustice done to the Other by Roman Catholic Protestant and other centred and unitary models of religious pluralism that allows the introduction of

Foucault's de-centring of transcendence and human reason as an alternative model for understanding religious diversity and the role it ought to play in the constitution of the self and the making of society. This Foucaultian approach provides a new direction for interfaith dialogue in the modern world and leads to an ethical rather than a nihilistic position while fostering a non-unitary theology of religious pluralism and an open textured process of self transformation. The author's original and imaginative application and expansion of Foucault's concept of the *More* from *The Archaeology of Knowledge* 1969 makes important and original contributions to academic work on Foucault and contemporary theology.

Foucault 2.0 Eric Paras, 2020-01-14 A dramatically new interpretation of the development of the thought of Michel Foucault one of the 20th century's most influential thinkers. In this lucid and groundbreaking work Eric Paras reveals that our understanding of the philosophy of Michel Foucault must be radically revised. Foucault's critical axes of power and knowledge which purposefully eradicated the concept of free will reappear as targets in his later work. Paras demonstrates the logic that led Foucault to move from a microphysics of power to an aesthetics of individual experience. He is the first to show a transformation that not only placed Foucault in opposition to the archaeological and genealogical positions for which he is renowned but aligned him with some of his fiercest antagonists. *Foucault 2.0* draws on the full range of the philosopher's writing and of the work of contemporaries who influenced and sometimes vehemently opposed his ideas. To fill the gaps in Foucault's published writings that have so far limited our conception of the arc of his thought Paras analyzes the largely untapped trove of lectures Foucault delivered to teeming Paris audiences as Professor of the Collège de France for more than a decade. At the same time *Foucault 2.0* highlights the background against which Foucault carried out his most foundational work: the unrest of 1968, the prison reform movement of the early 1970s and the Iranian Revolution of 1979. Carefully assembling the fragments of a thinker who remains but half understood Eric Paras has composed a seminal book essential reading for novices and initiates alike.

[Mapping the Present](#) Stuart Elden, 2002-01-01 In a late interview Foucault suggested that Heidegger was for him the essential philosopher. Taking this claim seriously *Mapping the Present* assesses the relationship between these two thinkers particularly on the issue of space and history. It suggests that space and history need to be rethought and combined as a spatial history rather than as a history of space. In other words space should become not merely an object of analysis but a tool of analysis. The first half of the book concentrates on Heidegger from the early occlusion of space through the politically charged readings of Nietzsche and Holderlin to the later work on art, technology and the polis which accord equal status to issues of spatiality. Foucault's work is then rethought in the light of the analysis of Heidegger and the project of a spatial history established through re-readings of his works on madness and discipline.

French Historians 1900-2000 Philip Daileader, Philip Whalen, 2010-03-16 *French Historians 1900-2000* The New Historical Writing in Twentieth Century France examines the lives and writings of 40 of France's great twentieth century historians. Blends biography with critical analysis of major works placing the work of the French historians in the context of their lifetimes. Includes contributions

from over 30 international scholars Provides English speaking readers with a new insight into the key French historians of the last century *The Routledge Handbook of Critical Pedagogies for Social Work* Christine Morley, Phillip Ablett, Carolyn Noble, Stephen Cowden, 2020-01-20 The Routledge Handbook of Critical Pedagogies for Social Work traverses new territory by providing a cutting edge overview of the work of classic and contemporary theorists in a way that expands their application and utility in social work education and practice thus providing a bridge between critical theory philosophy and social work Each chapter showcases the work of a specific critical educational philosophical and or social theorist including Henry Giroux Michel Foucault Cornelius Castoriadis Herbert Marcuse Paulo Freire bell hooks Joan Tronto Iris Marion Young Karl Marx Antonio Gramsci and many others to elucidate the ways in which their key pedagogic concepts can be applied to specific aspects of social work education and practice The text exhibits a range of research based approaches to educating social work practitioners as agents of social change It provides a robust and much needed alternative paradigm to the technique driven conservative revolution currently being fostered by neoliberalism in both social work education and practice The volume will be instructive for social work educators who aim to teach for social change by assisting students to develop counter hegemonic practices of resistance and agency and reflecting on the pedagogic role of social work practice more widely The volume holds relevance for both postgraduate and undergraduate qualifying social work and human services courses around the world

Foucault and Heidegger Alan Milchman, Alan Rosenberg, 2003 Michel Foucault and Martin Heidegger are two of the most important intellectual figures of the twentieth century and yet there are significant largely unexplored questions about the relationship between their projects Foucault and Heidegger stages a crucial critical encounter between these two thinkers in doing so it clarifies not only the complexities of the Heidegger Foucault relationship but also their relevance to questions about truth and nihilism acquiescence and resistance and technology and agency that are central to debates in contemporary thought These essays examine topics ranging from Heidegger's and Foucault's intellectual forebears to their respective understanding of the Enlightenment modernity and technology to their conceptions of power and the political
