Hill, 1988 Hill contends that French officials in the postwar decade had already perceived a deep rooted American indifference even hostility to a number of vital French national interests The author examines the harsh disappointments what solutions they sought or how keenly frustrated they became when despite American protestations of gratitude for French assistance during the war for independence they found self interested Americans unwilling to heed the least claims of an erstwhile ally **Black and White**, An assessment of the cultural mix of slave and slave holder *World of the Founders* Stephen L. Gilfoyle,1994 Winner of the Allan Nevins Prize of the Society of American Historians and the New York State Historical Association Manuscript Prize *Eating History* Andrew F. Smith,2009-09-18 Food expert and celebrated food historian Andrew F Smith recounts in delicious detail the creation of contemporary American cuisine The diet of the modern American wasn t always as corporate conglomerated and corn rich as it is today and the style of American cooking along with the ingredients that compose it has never been fixed With a cast of characters including bold inventors savvy restaurateurs ruthless advertisers mad scientists adventurous entrepreneurs celebrity chefs and relentless health nuts Smith pins down the truly crackerjack history behind the way America eats Smith s story opens with early America an agriculturally independent nation where most citizens grew and consumed their own food Over the next two hundred years however Americans would cultivate an entirely different approach to crops and consumption Advances in food processing transportation regulation nutrition and science introduced highly complex and mechanized methods of production The proliferation of cookbooks cooking shows and professionally designed kitchens made meals more commercially politically and culturally potent To better understand these trends Smith delves deeply and humorously into their creation Ultimately he shows how by revisiting this history we can reclaim the independent locally sustainable roots of American food The Culture and Commerce of the Early American Novel Stephen Shapiro,2010-11 Taking his cue from Philadelphia born novelist Charles Brockden Brown s *Annals of Europe and America* which contends that America is shaped most noticeably by the international struggle between Great Britain and France for control of the world trade market Stephen Shapiro charts the advent decline and reinvigoration of the early American novel That the American novel sprang so unexpectedly into published existence during the 1790s may be a symptom of the beginning of the end of Franco British supremacy and a reflection of the power of a middle class riding the crest of a new world economic system Shapiro s world systems approach is a relatively new methodology for literary studies but it brings two particularly useful features to the table First it refines the conceptual frameworks for analyzing cultural and social history such as the rise in sentimentalism in relation to a long wave economic history of global commerce second it fosters a new model for a comparative American Studies across time Rather than relying on contiguous time a world systems approach might compare the cultural production of one region to another at the same location within the recurring cycle in an economic reconfiguration Shapiro offers a new way of thinking about the causes for the emergence of the American novel that suggests a fresh way of rethinking the overall paradigms shaping American Studies **Investing in**
