Religion And The Academic Scene:

Religion and the Academic Scene Krister Stendahl, 1975 *The Science of Religion: A Defence* Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies. *The Science of Religion: A Defence* offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion, the development of his thinking over time, and of his intellectual commitment to a science of religion. The work is divided into three parts. The first part identifies pertinent connections between religion, religious studies, and science, and why reductionism in the academic study of religion, when properly applied, can bridge the explanatory gap between the sceptic and the devotee. The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief, understanding, and meaning in the modern study of religion. The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome. Finally, two new essays are included: a critique on *The Preconceptions of a Science of Religion* by Anthony J. Palma and an accompanying reply by Donald Wiebe. *The Science of Religion: A Defence* is an essential resource for both scholarly and non-scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion.

The Learned Practice of Religion in the Modern University Donald Wiebe, 2019-11-14 In these essays, Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe: that studies almost always exhibit a religious bias. To explore this issue, Wiebe looks at the religious and moral agendas behind the study of religion, showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred. As a result, he argues, religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny. This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour. Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing, Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints. He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena.

The Bible and Other Faiths Ida Glaser, 2012-03-14 In today's world, when Christians think about other religions, numerous questions and issues arise, and their convictions about Christ and about other religions can have a significant influence on their understanding of how God relates to people and what their own conduct towards them should be. From her wealth of inter-cultural and inter-faith experience, Ida Glaser believes that the most urgent questions for Christians focus on their own responsibilities and other people's welfare. Responding to Micah 6:8, "And what does the Lord require of you? To act justly and to love mercy and to walk humbly with your God," Dr. Glaser explores

biblical perspectives on other faiths and their adherents with clarity sensitivity and challenging insights for all Christians

Religion and Reductionism Idinopulos, Yonan, 2018-08-14 This volume on Religion and Reductionism grew out of a conference convened in November 1990 where the participants were asked to respond to the conceptual and methodological problem of reductionism in the academic study of religion The conference focused on the writings of Robert A Segal and his defence of reductionism and criticism of Mircea Eliade's non reductive interpretation of religion At the Miami conference some of the most important and enduring questions were raised 1 What is religion 2 What is religion and or religious meaning 3 How should religion be studied and taught 4 What are the possibilities and limits of social scientific analyses of religious phenomena 5 What is reductionism 6 What is anti reductionism These and other questions on religion and reductionism are widespread and invite serious consideration they help to illuminate the basic issues that are at the core of any study of the world's major religions
