Rediscovering the Umma Ina Merdjanova,2016 This book discusses the role of Islam in the political and social developments in the Balkans after the fall of communism It explores comparatively the transformations of Muslim identities under the influence of various national and transnational domestic and global factors

Religious Identities and the Global South Felix Wilfred,2021-01-04 This book offers a comprehensive and interdisciplinary account of religious identities in the Global South Drawing on literature in various fields Felix Wilfred analyzes how religious identities intersect with the processes of globalization modernity and postmodernity He illustrates how the study of religion in the Global North often revolves around questions of secularism and fundamentalism whereas a neo Orientalist quality often attends study of religion in the Global South These approaches and theorizing fail to incorporate the experiences of lived religion in the South especially in Asia Historically the religions in the South have played a highly significant role in resistance to the domination by the colonial forces an important reason for the continued attachment of the peoples of the South to their religious universe This book puts the two regions and their scholarly norms in conversation with one another exploring the social political cultural and economic implications

History and Popular Memory Paul A Cohen,2014-05-13 When people experience a traumatic event such as war or the threat of annihilation they often turn to history for stories that promise a positive outcome to their suffering During World War II the French took comfort in the story of Joan of Arc and her heroic efforts to rid France of foreign occupation To bring the Joan narrative more into line with current circumstances popular retellings modified the original story so that what people believed took place in the past was often quite different from what actually occurred Paul A Cohen believes this interplay between story and history is a worldwide phenomenon found in countries of radically different cultural religious and social character He focuses on Serbia Israel the Soviet Union China Great Britain and France all of which experienced severe crises in the twentieth century and in response appropriated age old historical narratives that resonated with what was happening in the present to serve a unifying restorative purpose A central theme in the book is the distinction between popular memory and history Although vitally important to historians this distinction is routinely blurred in people s minds and the historian s truth often cannot compete with the power of a

compelling story from the past even when it has been seriously distorted by myth or political manipulation Cohen concludes by suggesting that the patterns of interaction he probes given their near universality may well be rooted in certain human propensities that transcend cultural difference *Religion and Contemporary Politics* Timothy J. Demy, Jeffrey M. Shaw Ph.D., 2019-09-19 With respect to the countries of the world this work addresses two basic questions How does religion affect politics in this country and How does politics affect religion in this country Although there are many books on the topics of religion and politics reference works that consider the two together are few with those that do exist primarily addressing theory rather than trends The present work does the latter contextualizing them within regional and national boundaries In so doing it recognizes the power of political and religious ideas and movements on individuals communities and nations making the work a valuable resource for several disciplines among them political science international relations religion and sociology The work focuses on the interplay of religion and politics in countries around the world with an emphasis on the post 2000s It is organized by global geographic regions including Africa Central and South America and the Middle East and presents countries alphabetically within those sections Each region has a brief overview of the political religious dynamics of the area so readers can compare and contrast the dynamics between and among countries in a region The work also includes an introduction sidebars and a bibliography **Faith- Based Diplomacy Trumping Realpolitik** Douglas Johnston, 2008-06-02 For most of the twentieth century the most critical concerns of national security have been balance of power politics and the global arms race The religious conflicts of this era and the motives behind them however demand a radical break with this tradition If the United States is to prevail in its long term contest with extremist Islam it will need to re examine old assumptions expand the scope of its thinking to include religion and other irrational factors and be willing to depart from past practice A purely military response in reaction to such attacks will simply not suffice What will be required is a long term strategy of cultural engagement backed by a deeper understanding of how others view the world and what is important to them In non Western cultures religion is a primary motivation for political actions Historically dismissed by Western policymakers as a divisive influence religion in fact has significant potential for overcoming the obstacles that lead to paralysis and stalemate The Incorporation of religion as part of the solution to such problems is as simple as it is profound It is long overdue This book looks at five intractable conflicts and explores the possibility of drawing on religion as a force for peace It builds upon the insights of *Religion the Missing Dimension of Statecraft* OUP 1994 which examined the role that religious or spiritual factors can play in preventing or resolving conflict while achieving social change based on justice and reconciliation The world class authors writing in this volume suggest how the peacemaking tenets of five major world religions can be strategically applied in ongoing conflicts in which those religions are involved Finally the commonalities and differences between these religions are examined with an eye toward further applications in peacemaking and conflict resolution *Nordic, Central, and Southeastern Europe 2022-2023* Wayne C.
