Robertson,2021-08-12 Building on critical work in biblical studies which shows how a historically bounded heretical tradition called Gnosticism was invented this work focuses on the following stage in which it was essentialised into a sui generis universal category of religion At the same time it shows how Gnosticism became a religious self identifier with a number of sizable contemporary groups identifying as Gnostics today drawing on the same discourses This book provides a history of this problematic category and its relationship with scholarly and popular discourse on religion in the twentieth century It uses a critical historical method to show how and why Gnosis Gnostic and Gnosticism were taken up by specific groups and individuals practitioners and scholars at different times It shows how ideas about Gnosticism developed in late nineteenth and twentieth century scholarship drawing from continental phenomenology Jungian psychology and post Holocaust theology to be constructed as a perennial religious current based on special knowledge of the divine in a corrupt world David G Robertson challenges how scholars interact with the category Gnosticism and contributes to our understanding of the complex relationship between primary sources

**Representing Religion** Tim

Murphy, 2014-12-05. If religion is continually in a state of flux, how can the study of religion critically examine contemporary religious beliefs and values?

*Representing Religion* critically examines this crisis of representation. The volume traces the history of religious studies, critiquing the concept that experience is central to understanding religion. The views of influential semioticians and philosophers, notably Nietzsche, Saussure, Foucault, Barthes, and Bakhtin, are used to construct a new methodology for the critical study of religion. *Representing Religion* will be of interest to students and scholars of semiotics as well as theory and method in religious studies.

**The**

**Politics of Spirit** Tim Murphy, 2010-12-28. A penetrating critique of the dominant approach to the study of religion. *The Politics of Spirit* explores the historical and philosophical scaffolding of the phenomenology of religion. Although this approach purports to give a value-free, neutral description of religious data, it actually imposes a set of metaphysical and evaluative concepts on that data. A very harmful ethnocentrism has resulted, which plagues the academic study of religion to this day. Analysis of the history, core texts, and discursive structure of phenomenology of religion reveals how this

ethnocentrism is embedded within its assumptions. Of particular interest is the revelation of the extent to which Hegel's ideas, over those of Husserl, contributed to the tenets that became standard in the study of religion. Tim Murphy argues that the poststructuralist concept of genealogy, as derived from Nietzsche, can both describe religion better than the phenomenological approach and avoid the political pitfalls of ethnocentrism by replacing its core categories with the categories of difference, contingency, and otherness. Ultimately, Murphy argues that postmodern genealogy should replace phenomenology as the paradigm for understanding both religion and the study of religion.
