The American College, 1910 **Science, Religion, and the Protestant Tradition** James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811-1882 and Andrew Dickson White 1832-1918 constructed dramatic narratives in the nineteenth century that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation

The Profits of Religion Upton Sinclair, 2019-11-20 In *The Profits of Religion* Upton Sinclair investigates the complex interplay between capitalism and organized religion deftly employing a critical and journalistic literary style that aligns with his muckraking roots This seminal work scrutinizes the ways in which religious institutions often serve as vehicles for economic exploitation and societal manipulation challenging the notion of spiritual salvation in a capitalist society Sinclair meticulously dissects various faiths ranging from Christianity to Judaism revealing how their leaders and practices frequently prioritize profit over genuine spiritual fulfillment thereby creating a profound dialogue on morality and ethics in the early 20th century Upton Sinclair an influential American writer and social activist was profoundly shaped by the socio-economic challenges of his time His

experiences in the labor movement and engagement with progressive politics compelled him to explore themes of class struggle and social justice Sinclair s creative output including the groundbreaking The Jungle underscores his commitment to exposing societal ills making him a pivotal figure in the critique of industrial capitalism The Profits of Religion is essential reading for anyone interested in the intersections of faith commerce and social justice Sinclair s incisive analysis serves as a clarion call for critical thought inviting readers to confront the ethical dilemmas associated with materialism and organized religion This book remains relevant today challenging readers to reflect on the contemporary implications of its themes
