'Religion' and the Religions in the English Enlightenment Peter Harrison, 2002-05-02 This study examines the changes which took place in the understanding of religion and the religions during the Enlightenment in England the period when the decisive break with Patristic Medieval and Renaissance notions of

religion occurred Dr Harrison's view is that the principles of the English Enlightenment not only made a special contribution to our modern understanding of what religion is but they pioneered in addition the scientific or non religious approach to religious phenomena During this period a crisis of authority in the Church necessitated a rational enquiry into the various forms of Christianity and in addition into the claims of all religions This led to a concept of religion based on natural theology which could link together the apparently disparate religious beliefs and practices found in the empirical religions

Religion at Play Andre Droogers, 2014-10-08 Is a powerful position a guarantee that a religion will continue Does God take sides in religious power struggles Can God survive religious exclusivity and diversity Is God migrating from out there to in here Is religion sustainable in the long run In seeking answers to these questions this book explores the possibilities afforded by playful religion Religion has playful origins but this aspect is forgotten as soon as institutional power becomes self serving instead of subservient Power changes the very essence of religion Virtually all religions are distorted versions of a playful original Institutionalization is religion's curse not its blessing Apparent success hides the failure of religion to be faithful to its original intent This book helps find the way back from bordering to inclusivity and openness *Religion, Theory, Critique* Richard King, 2017-07-18 Religion Theory Critique is an essential tool for learning about theory and method in the study of religion Leading experts engage with contemporary and classical theories as well as non Western cultural contexts Unlike other collections this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion secular and culture are imagined within different disciplinary horizons This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories Contributors write on the influence of the natural sciences in the study of religion the role of European Christianity in modeling theories of religion religious experience and the interface with cognitive science the structure and function of religious language the social scientific study of religion ritual in religion the phenomenology of religion critical theory and religion embodiment and religion the impact of colonialism and modernity theorizing religion in terms of race and ethnicity links among religion nationalism and globalization the interplay of gender sex and religion and religion and the environment Each chapter introduces the topic identifies key theorists and issues and respects the pluralistic nature of the scholarship in the field Altogether this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis **The Oxford Handbook of the Study of Religion** Michael Stausberg, Steven Engler, 2016 The Oxford Handbook of the Study of Religions provides a comprehensive overview of the academic study of religions Written by an international team of leading scholars its fifty one chapters are divided thematically into seven sections The first section addresses five major conceptual aspects of research on religion Part two surveys eleven main frameworks of analysis interpretation and explanation of religion Reflecting recent turns in the humanities and social sciences part three considers eight forms of the expression of religion

Part four provides a discussion of the ways societies and religions or religious organizations are shaped by different forms of allocation of resources i.e. economy. Each chapter in the Handbook references at least two different religions to provide fresh and innovative perspectives on key issues in the field. Studying Religion, Past and Present Nickolas P. Roubekas, Dimitris Xygalatas, Luther H. Martin, Donald Wiebe, 2024-09-05. Celebrating the contributions of Panayotis Pachis to the field, this book discusses the past, present, and future of the study of religion in antiquity and modernity. Panayotis Pachis has dedicated his celebrated career at the Aristotle University of Thessaloniki to the study of various aspects of ancient religions. The contents of this book reflect Pachis's conviction that the study of religious ideas and practices should be focused on three pillars: the study of history, the formulation and application of theoretical frameworks, and the utilization of traditional as well as innovative methodological tools. Chapters range from the scientific study of Roman Graeco religions, cultural evolution, and neurocognitive theories in the history and study of religion to a look at why we need an integrative approach to study religion past and present.

Edward Said's Rhetoric of the Secular Mathieu E. Courville, 2011-10-20. Edward Said's *Rhetoric of the Secular* provides an important new reading of Edward W. Said's work, emphasizing not only the distinction but also the fuzzy borders between representations of the religious and the secular found within and throughout his oeuvre, and at the core of some of his most customary rhetorical strategies. Mathieu Courville begins by examining Said's own reflections on his life before moving on to key debates about Said's work within Religious Studies and Middle Eastern Studies and his relationship to French critical theorists. Through close attention to Said's use of the literal and the figurative when dealing with religious, national, and cultural matters, Courville discerns a pattern that illuminates what Said means by secular. Said's work shows that the secular is not the utter opposite of religion in the modern globalized world but may exist in a productive tension with it.
