

## Legitimation Power And Religion In Modern Society

Nikos Kokosalakis  
University of Liverpool

*This paper suggests that a focus on the relation between religion, power and legitimation in modern society may provide fruitful theoretical directions for the sociology of religion and mitigate against the epistemological problems which the discipline has inherited from traditional sociological perspectives. Such an approach raises the question of the relationship of religion and politics in the context of the modern nation state and involves an examination of the nature of the cultural and moral framework within which power structures and power relations operate in modern society. The almost universal separation of church and state in western societies does not necessarily imply a corresponding separation between religious culture and politics. There is now sufficient evidence to suggest that the sociology of religion cannot continue to treat processes of legitimation and the secularization of political power in modern society as unproblematic issues.*

### Introduction

Uneasiness about the status and the theoretical foundations of the sociology of religion has been growing amongst its practitioners for sometime. Recently Richard Fenn (1982), in considering the state of the art, has suggested that the problem has now reached the level of epistemological crisis. Although I share his views I believe that the problem may lie even deeper than he suggests and has in fact to be located in the epistemological foundations of the classical sociological perspectives from within which the sociologists of religion operate. However, my intention here is not to engage in discussion concerning fundamental epistemological issues. Rather, I wish to suggest that a focus on the relationship between legitimation, power and religion<sup>1</sup> in modern society may lead to fruitful theoretical directions. I am aware that the subject is exceptionally broad and complex but the historical relationship between religion and power and developments in this area, in various parts of the world over the last twenty years, suggest that it cannot be a peripheral issue for the sociology of religion.

It is now a truism to say that in modern society, by and large, the legitimation of political power is no longer linked to traditional theologies and explicit religious symbolism as was clearly the case up to the 19th century. Yet, for the purpose of assessing the theoretical connection between religion and power in modern society, starting from the separation of religion and politics is misleading. Indeed, such separation implies that contemporary power struggles and power relations generally operate outside any religio-ideological and ethical context. Moreover assessing the question of legitimation and the function of religion in modern society from the standpoint of social and functional differentiation, as N. Luhmann (1969, 1977) does for instance, is bound to attenuate the

<sup>1</sup>I define religion with D. Martin (1978:12) as "an acceptance of a level of reality beyond the observable world known to science, to which are ascribed meanings and purposes completing and transcending those of the purely human realm."

**Religion and Political Power** Gustavo Benavides, M. W.

Daly, 1989-07-28 This book explores the interaction between two of the most charged topics in the modern world: religion and politics. It shows the inextricable connection between religious attitudes and representations and political activities. After an introductory chapter explores theoretically the religious articulations of political power, the authors examine the role played by religion in the current political situation in several countries. Approaching these cases as anthropologists, historians, sociologists, and political scientists, the authors make visible the dialectical relationship between religion and the pursuit of political power: on the one hand, the political significance of religious choices; and on the other, the almost unavoidable need to articulate in religious terms a group's attempt to acquire, maintain, or expand political power.

**The Power of Religion in the Public Sphere** Judith Butler, Jürgen Habermas, Charles Taylor, Cornel West, 2011-03-02

The Power of Religion in the Public Sphere represents a rare opportunity to experience a diverse group of preeminent philosophers confronting one pervasive contemporary concern: what role does or should religion play in our public lives. Reflecting on her recent work concerning state violence in Israel/Palestine, Judith Butler explores the potential of religious perspectives for renewing cultural and political criticism. While Jürgen Habermas, best known for his seminal conception of the public sphere, thinks through the ambiguous legacy of the concept of the political in contemporary theory, Charles Taylor argues for a radical redefinition of secularism, and Cornel West defends civil disobedience and emancipatory theology. Eduardo Mendieta and Jonathan VanAntwerpen detail the immense contribution of these philosophers to contemporary social and political theory, and an afterword by Craig Calhoun places these attempts to reconceive the significance of both religion and the secular in the context of contemporary national and international politics.

Religious Rights within the Family Esther

Erlings, 2019-07-05 It is often asserted that a family that prays together stays together. But what if a child no longer wishes to pray? This book analyses the law in relation to situations where parents force their children to manifest the parental religion. From thorough examination of international law, it argues that unlike what is generally believed, the human rights regime does not grant parents a right to impose manifestations of their religion on their children. Instead, the author proposes to regard coerced manifestations as a limitation on children's right to freedom of manifestation based on national laws that give parents rights at the domestic level under principles such as parental responsibility. The book focuses on two aspects of States' positive obligations in this regard: first, the obligation to provide a regulatory framework that can protect children's right to freedom of manifestation and restricts limitations to those that are proportionate or necessary in a democratic

society Second to provide access to remedies which it is argued should consist of access to a family friendly infrastructure for dispute resolution available to parents and children in conflict over religious manifestation Both depend heavily on the way States balance power between parents and children at the national level The book includes three case studies and social research of jurisdictions that offer different perspectives under the principles of parental authority France parental responsibility England and parental rights Hong Kong *Religion, Power and Protest in Local Communities* Eric R. played a weaker role in legitimizing rule especially where Protestantism spread indeed the Reformation was successful due to the spread of printing which was blocked in the Middle East It was precisely in those Protestant nations especially England and the Dutch Republic where the modern economy was born      **Law as Religion, Religion as Law** David C.

Henne demonstrates that religion although not as high profile or well funded a tool as economic sanctions or threats of military force remains a potent weapon in international relations Public policy analysis often minimizes the role of religion favoring military or economic matters as the important arenas of policy debate As Henne shows however at transformative moments in political history states turn to faith based appeals to integrate or fragment international coalitions Henne highlights Saudi Arabia s 1960s rivalry with Egypt the United States s post 9 11 leadership in the global war on terrorism and the Russian Federation s contemporary expansionism both to reveal the presence and power of calls for religious unity and to emphasize the uncertainty and anxiety such appeals can create Religious Appeals in Power Politics offers a bold corrective to those who consider religion as tangential to military or economic might      *Major World Religions* Lloyd Ridgeon,2003-12-08 This work seeks to answer questions about the great religious traditions in the contemporary age It focuses upon those religions that continue to demand the attention of the Western world Following an introduction on the philosophy of religion attention is focused on Hinduism Buddhism Judaism Christianity and Islam which are religions that have had and probably continue to have the greatest number of followers in Western society In addition to the lasting impact that religion has had in society we are witnesses to the development of secularism on the one hand and the revival of religious sentiment on the other thus chapters on modernity postmodernism and fundamentalism have also been included The distinctive feature of the book is its modern feel Each chapter brings the reader up to date with recent developments and commentaries upon recent religious thought theology and religious political movements Moreover the length of the chapters permits a detailed analysis which is so often lacking in books on world religions      *Politics and Religion in Zimbabwe* Ezra Chitando,2020-04-03 This book illustrates how religion and ideology were used by Robert Mugabe to ward off opposition within his own party in Zimbabwe and from the West An interdisciplinary line up of contributors argue that Mugabe used a calculated narrative of deification presenting himself as a divine figure who had the task of delivering land freedom and confidence to black people across the world to remain in power in Zimbabwe The chapters highlight the appropriation and deployment of religious themes in Mugabe s domestic and international politics reflect on the contestation around the deification of Mugabe in Zimbabwean politics across different forms of religious expression including African Traditional Religions and various strands of Christianity and initiate further reflections on the interface between religion and politics in Africa and globally Politics and Religion in Zimbabwe will be of interest to scholars of religion and politics Southern Africa and African politics      *Religious Traditions Among Tai Ethnic Groups* Shigeharu Tanabe,1991 The Tai groups include those in Thailand Laos Burma and other areas chiefly in Southeast Asia      Place/Culture/Representation James S.
