Religion In Focus Buddhism:

Religions in Focus Graham Harvey, 2016-04-08 *Religions in Focus* engages with the religious lives of members of some of the most significant religions today. It presents religions as contemporary ways of life that motivate and inspire people. Because religious people refer to sacred texts, honour the founders of their religions, learn from elders or mould their lives according to authoritative teachings, *Religions in Focus* explains the relationship between tradition and contemporary practice. It offers an introduction to religions that is rooted in the best scholarship of the Study of Religions and provides a secure foundation for further study. A team of Religious Studies scholars from many countries, all skilled communicators about the contemporary religions with which they are thoroughly familiar, introduce what it means to live as a religious person today. They insist that, however old or young, these religions may be, what is most interesting is the ways in which people express them today. This is not a history of religions but an insightful introduction to living religions. A guide to further study and a companion website will point to ways of building on knowledge gained in studying this book and applying skills developed in studying people's religious lives.

A Comparative Sociology of World Religions Stephen Sharot, 2001-08
Sharot's sociology of Ben Gurion University of the Negev focuses on the differences and interrelationships between religious elites and lay masses. He presents several relevant concepts and theories, including a model of religious action based on the work of Max Weber and a discussion of elites and masses as represented in Weber's comparison of world religions. Coverage encompasses religious action in world religions: Brahmins, Renouncers, and Hinduism in India; Buddhism and Animism in Sri Lanka and Southeast Asia; traditional Catholicism in Europe; Islam and Judaism; Protestants, Catholics, and the reform of popular religion; and a comparison of religious elites and popular religions. c. The Study of Religion in British Columbia
Brian J. Fraser, 2006-01-01 *The Study of Religion in British Columbia* is a story of enterprise, innovation, and isolation. In this unique survey, Brian J. Fraser examines the history and development of the institutions of higher education where religion is taught and describes the methods used to understand the religious dimension of human endeavour in Canada's westernmost province. Fraser analyzes the sources, development, and persistence of two distinct approaches to the study of religion in British Columbia: theological studies and religious studies. He traces the early strength and recent expansion of theological studies, especially among conservative evangelical Christians, and sets the creation of British Columbia's only department of religious studies at the University of British Columbia in this context. He also describes the innovative curricula designed by several of the institutions for the study of religion in the province. Finally, he contends that the differing views on the nature of religion held by these institutions and their constituencies have led to a continuing isolation from each other. *The Study of Religion in British Columbia* is the latest volume in the Canadian Corporation for the Study of Religion's series on the study of religion in Canada. Readers interested in the rich diversity of personalities and perspectives that have shaped religious studies in British Columbia will find here a concise description of its evolution and a thought-provoking examination of its

The Invention of Religion in Japan

Jason Ānanda Josephson,Jason Ananda Josephson Storm,2012-10-03 Throughout its long history Japan had no concept of what we call religion There was no corresponding Japanese word nor anything close to its meaning But when American warships appeared off the coast of Japan in 1853 and forced the Japanese government to sign treaties demanding among

other things freedom of religion the country had to contend with this Western idea In this book Jason Ananda Josephson reveals how Japanese officials invented religion in Japan and traces the sweeping intellectual legal and cultural changes that followed More than a tale of oppression or hegemony Josephson s account demonstrates that the process of articulating religion offered the Japanese state a valuable opportunity In addition to carving out space for belief in Christianity and certain forms of Buddhism Japanese officials excluded Shinto from the category Instead they enshrined it as a national ideology while relegating the popular practices of indigenous shamans and female mediums to the category of superstitions and thus beyond the sphere of tolerance Josephson argues that the invention of religion in Japan was a politically charged boundary drawing exercise that not only extensively reclassified the inherited materials of Buddhism Confucianism and Shinto to lasting effect but also reshaped in subtle but significant ways our own formulation of the concept of religion today This ambitious and wide ranging book contributes an important perspective to broader debates on the nature of religion the secular science and superstition

Religious Dynamics under the Impact of Imperialism and Colonialism Björn

Bentlage, Marion Eggert, Hans Martin Krämer, Stefan Reichmuth, 2016-10-11. This sourcebook offers rare insights into a formative period in the modern history of religions. Throughout the late 19th and the early 20th centuries when commercial, political, and cultural contacts intensified worldwide, politics and religions became ever more entangled. This volume offers a wide range of translated source texts from all over Asia, the Middle East, and Europe, thereby diminishing the difficulty of having to handle the plurality of involved languages and backgrounds. The ways in which the original authors, some prominent and others little known, thought about their own religion, its place in the world, and its relation to other religions allows for much needed insight into the shared and analogous challenges of an age dominated by imperialism and colonialism.
