spiritualized versions of a vital principle reflecting popular contemporary therapies and nineteenth century metaphysical beliefs including the idea that the spine was home to occult forces The creation of chiropractic and other Progressive era versions of alternative medicine happened at a time when the relationship between science and religion took on an urgent increasingly competitive tinge Many remarkable people including the Palmers undertook highly personal reinterpretations of their physical and spiritual worlds In this context Folk reframes alternative medicine and spirituality as a type of populist intellectual culture in which ideologies about the body comprise a highly appealing form of cultural resistance

**Borders of Belief** Gregory J. Goalwin, 2022-07-15 Religion and nationalism are two of the most powerful forces in the world And as powerful as they are separately humans throughout history have fused religious beliefs and nationalist politics to develop religious nationalism which uses religious identity to define membership in the national community But why and how have modern nationalists built religious identity as the foundational signifier of national identity in what sociologists have predicted would be a more secular world This book takes two cases nationalism in both Ireland and Turkey in the 20th century as a foundation to advance a new theory of religious nationalism By comparing cases Goalwin emphasizes how modern political actors deploy religious identity as a boundary that differentiates national groups This theory argues that religious nationalism is not a knee jerk reaction to secular modernization but a powerful movement developed as a tool that forges new and independent national identities
