Interpretive Theories of Religion Donald A. Crosby, 2019-07-22 No detailed description available for *Interpretive Theories of Religion* **A Historical and Theoretical Guide to Studying Religion** Wesley Kort, 2024-01-16 This book a guide to studying religion has two parts The first or historical part traces the rise of the academic study of religion from the early nineteenth century to the present day Primary attention is given to the relation of studying religion to Romanticism and

to its contrary relations to principal characteristics of Western modernity especially its rational and materialist emphases The second part of the book addresses matters that present uncertainties problems and even tensions within the field such as what is or should be meant by referring to some persons or groups as religious why religion is so often a cause of tensions and even conflicts both within and between religious groups and between them and the increasingly nonreligious or secular quality of modern Western culture and the problem that arises for the field by reason of scholars who on one side are themselves religious and who on the other side are nonreligious or secular The book places this final difficulty the difference and often the tension between religious and nonreligious approaches to the study of religion in the role of a unifying theme of the book and offers a way by which this problem can be addressed and to a considerable degree reduced Identity, Religion And Values C. Margaret Hall, 2013-10-08 This handbook for clinicians focuses on the impact of religion and spirituality on the client using the clinical sociological theory of identity empowerment The ten concepts of this theory show how identity can be expressed in value choices self dyad triad family religion definition of the situation reference group class culture and society The professor includes case studies and strategies for intervention at the end of each chapter My Absurd Religion Steve Gray, 2008 The World's Need of Religion World Congress of Faiths, 1937 A Debate on the Roman Catholic Religion Alexander Campbell, John Baptist Purcell, 1837 Natural Religion and the Nature of Religion Peter Byrne, 2013-05-02 This study offers students of religion and philosophy introductory chapters concerning the concept of natural religion It holds that we can't engage in useful discussion about the present concept of religion without a knowledge of the philosophical history that has shaped that concept This is discussed with reference to the notion of natural religion to illustrate certain aspects of deism and its legacy Originally published in 1989 The Divine Economy Paul Seabright, 2024-05-14 Longlisted for the Financial Times and Schroders Business Book of the Year Award A novel economic interpretation of how religions have become so powerful in the modern world Religion in the twenty first century is alive and well across the world despite its apparent decline in North America and parts of Europe Vigorous competition between and within religious movements has led to their accumulating great power and wealth Religions in many traditions have honed their competitive strategies over thousands of years Today they are big business like businesses they must recruit raise funds disburse budgets manage facilities organize transportation motivate employees and get their message out In The Divine Economy economist Paul Seabright argues that religious movements are a special kind of business they are platforms bringing together communities of members who seek many different things from one another spiritual fulfillment friendship and marriage networks even business opportunities Their function as platforms he contends is what has allowed religions to consolidate and wield power This power can be used for good especially when religious movements provide their members with insurance against the shocks of modern life and a sense of worth in their communities It can also be used for harm political leaders often instrumentalize religious movements for authoritarian ends and religious leaders can exploit the trust

of members to inflict sexual emotional financial or physical abuse or to provoke violence against outsiders Writing in a nonpartisan spirit Seabright uses insights from economics to show how religion and secular society can work together in a world where some people feel no need for religion but many continue to respond with enthusiasm to its call *Inventing the New Dispensation in Zimbabwe* Ezra Chitando, Lovemore Togarasei, Joram Tarusarira, 2024-11-14 How does a regime whose members have been actively involved in the previous one appropriate and deploy religious ideas and rhetoric to cast itself as born again and attractive Exploring intersections between politics religion and economics this book examines invention of Zimbabwe's New Dispensation the regime of Emmerson D Mnangagwa and how it has aimed to separate itself from the previous regime of Robert G Mugabe Utilizing the concept of invention contributors reflect on how Mnangagwa and his publicists deploy religious ideas concepts and rhetoric in the quest for legitimacy in a heavily contested political field The book also reflects on the ways opposing political actors have utilized the same template in their quests to secure power The contributors interrogate the use of time theological ideas and religious practices to separate Mnangagwa's regime from Mugabe's This book provides insight into how religious rhetoric is used not only to gain but also to contest legitimacy in Zimbabwe's political sphere *Crane Valve World*, 1926 *Religious Experience and Religious Lives* Walter Scott Stepanenko, 2023-08-01 Religious Experience and Religious Lives An Epistemology defends a moderate approach to religious experiences in which they can contribute to the justification of central religious beliefs most importantly belief in God Epistemologists of religion disagree about what evidential value religious experiences have Some argue that religious experiences have no evidential value while others argue that religious experiences constitute proof of God's existence However Walter Scott Stepanenko argues that religious experiences can contribute to these justificatory cases in several distinct ways and that several justificatory cases are philosophically viable This book contends that this joint justificatory viability is best explained by the diversity and development of religious lives as religious believers grow in a faith tradition their access to an evidential base can develop and the contributory work religious experiences provide in defense of religious belief can change This suggests that various epistemologies of religious experience implicitly emphasize different life stages or different prototypical religious believers and that a fully adequate epistemology of religious experience will be expansive pluralistic and responsive to the diversity of religious believers and their development in a religious tradition
