Religious Commitment Personal Narrative And Healthcare Ethics Caring Well:

Smith, 2000-01-01 Caring Well reinvigorates the contribution of religion to medical ethics by developing new methodologies for approaching problems encountered in one particularly important aspect of the work of health care professionals care for the seriously ill It includes new work by some of the most prominent scholars in the field of medical ethics

Health Care and Christian Ethics Robin Gill, 2006-02-16 How can Christian ethics make a significant contribution to health care ethics in today's Western pluralistic society Robin Gill examines the moral gaps in secular accounts of health care ethics and the tensions within specifically theological accounts He explores the healing stories in the Synoptic Gospels identifying four core virtues present within them compassion care faith and humility that might bring greater depth to a purely secular interpretation of health care ethics Each of these virtues is examined in turn using a range of topical issues including health care rationing genetics HIV AIDS withholding withdrawing nutrition from PVS patients and the empirical evidence which suggests a connection between religion and health Professor Gill also argues that these four virtues are shared by other major religious and humanistic traditions and that together with secular principles they can enrich health care ethics even in a pluralistic society

Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2016 In this revised fourth edition of the classic textbook Devettere updates most chapters adding new cases on the following overriding advance directives the palliative care movement prenatal life and abortion neonatal testing and mandatory vaccinations facial transplantations genetic testing and legal issues surrounding the Affordable Care Act

Narrative and Stories in Health Care Yasmin Gunaratnam, David Oliviere, 2009-04-09 The use of narrative methods has a long history in palliative care pioneered by Dame Cicely Saunders founder of the modern hospice movement Narrative and Stories in Health Care provides a vibrant multidisciplinary examination of work with narrative and stories in contemporary health and social care with a focus on the care of people who are ill and dying It animates the academic literature with provocative real world examples from international contributors including palliative care service users and those working in the social and human sciences medicine theology and the creative arts Narrative and Stories in Health Care addresses and clarifies core issues What is a narrative What is a story What are some of the main methods and models that can be used and for what purposes What practical and ethical dilemmas can the methods entail in work with illness death and dying As well as highlighting the power of stories to create new possibilities the book also acknowledges the conceptual methodological and ethnical problems and challenges inherent in narrative work As the hospice and palliative care movement evolves to meet the challenges of 21st century health care this fascinating book highlights how narratives and stories can be attended to in ways that are productive ethical and caring

Partnership with the Dying David H. Smith, 2005-03-03 What do physicians nurses chaplains and social workers think about moral and religious issues in care for the dying These professionals live with death including many untimely and difficult deaths on a daily basis Based on intensive

interviews with a cross sample of health care professionals David H Smith details how the churches could not only be supportive of these primary caregivers in dealing with end of life issues but how they could enlist their help in informing their own congregations about the realities of death To care for the dying is spiritually demanding work Churches should not let health professionals struggle with religious issues whether of patients families or their own in isolation Smith s respondents offer powerful perspectives on the issue of physician assisted suicide Religious and theological ethics cannot afford to ignore insights and questions that come from those who deal with dying every day Finding meaning in the face of human suffering comes less from doctrine than from living a certain kind of life This book is a clarion call for new practical and vital forms of education support and commitment particularly within the churches in the cause of improving care for the dying

Children, Ethics, and Modern Medicine Richard B. Miller, 2003-06-18 Because the discipline of medical ethics has developed with autonomy as its foundation the field has ignored pediatric ethics The book is resoundingly successful in its effort to rectify this problem A pleasure to read Eric D Kodish M D Director Rainbow Center for Pediatric Ethics Case Western Reserve University Using a form of medical ethnography to investigate a variety of pediatric contexts Richard B Miller tests the fit of different ethical approaches in various medical settings to arrive at a new paradigm for how best to care for children Miller contends that the principle of beneficence must take priority over autonomy in the treatment of children Yet what is best for the child is a decision that doctors cannot make alone In making and implementing such decisions Miller argues doctors must become part of a therapeutic alliance with families and the child undergoing medical care to come up with the best solution Children Ethics and Modern Medicine combines strong philosophical argumentation with firsthand knowledge of the issues facing children and families in pediatric care This book will be an invaluable asset to medical ethicists and practitioners in pediatric care as well as parents struggling with ethical issues in the care of their children

together that bypasses our differences Craig insists that community engagement around the common religious conviction that healing is a shared responsibility can help us achieve this transformation one that will not only help us realize a new and better system but one that reflects the ideals of American democracy and the common good Religion and Ethics in the Neonatal Intensive Care Unit Ronald M. The Good Death Marilyn Webb, 2011-07-27 The Good Death is the first full scale examination of one of today's most complex issues the profound change in the way Americans think about and confront death Drawing on more than six years of firsthand research and reporting noted journalist Marilyn Webb builds her account around intimate portraits of the dying themselves She explains why some deaths become shockingly difficult and needlessly painful and how the struggles over end of life decisions can pit patient and family against hospitals doctors insurance companies religious groups and the law But there is good news as well Webb describes many extraordinary programs and individuals who are changing the face of dying An abundant source of comfort and hope The Good Death shows how the essential elements of humane even uplifted death are available to all of us if we know what is possible where to go for help and how to prepare A Ministry of Presence

Winnifred Fallers Sullivan, 2014-08-20 Most people in the United States today no longer live their lives under the guidance of local institutionalized religious leadership such as rabbis ministers and priests rather liberals and conservatives alike have taken charge of their own religious or spiritual practices This shift along with other social and cultural changes has opened up a perhaps surprising space for chaplains spiritual professionals who usually work with the endorsement of a religious community but do that work away from its immediate hierarchy ministering in a secular institution such as a prison the military or an airport to an ever changing group of clients of widely varying faiths and beliefs In *A Ministry of Presence* Winnifred Fallers Sullivan explores how chaplaincy works in the United States and in particular how it sits uneasily at the intersection of law and religion spiritual care and government regulation Responsible for ministering to the wandering souls

of the globalized economy the chaplain works with a clientele often unmarked by a specific religious identity and does so on behalf of a secular institution like a hospital Sullivan's examination of the sometimes heroic but often deeply ambiguous work yields fascinating insights into contemporary spiritual life the politics of religious freedom and the never ending negotiation of religion's place in American institutional life
