Religious Convictions

Duncan Pritchard, Mark Harris

Religious Convictions:

Religious Convictions and Political Choice Kent Greenawalt, 1987-12-10 How far may Americans properly rely on their religious beliefs when they make and defend political decisions For example are ordinary citizens or legislators doing something wrong when they consciously allow their decisions respecting abortion laws to be determined by their religious views Despite its intense contemporary relevance the full dimensions of this issue have until now not been thoroughly examined Religious Convictions and Political Choice represents the first attempt to fill this gap Beginning with an account of the basic premises of our liberal democracy Greenawalt moves to a comparison between rational secular grounds of decision and grounds based on religious convictions He discusses particular issues such as animal rights and abortion showing how religious convictions can bear on an individual's decisions about them and inquires whether reliance on such convictions is compatible with liberal democratic premises In conclusion he argues that citizens cannot be expected to rely exclusively on rational secular grounds

Religious Convictions and Political Choice Kent Greenawalt, 1991 How far may Americans properly rely on their religious beliefs when they make and defend political decisions Are decisions based on religious convictions compatible with liberal democratic premises Kent Greenawalt dissects such issues as abortion and animal rights to illustrate secular and religious bases for decision making concluding that citizens cannot be expected to rely exclusively on rational secular grounds

Religious Conviction in Liberal Politics Christopher J. Eberle, 2002-05-02 What role should a citizen's religious convictions play in her political activities Is she for example permitted to decide on the basis of her religious convictions to support laws that criminalize abortion or discourage homosexual relations Christopher Eberle is deeply at odds with the dominant orthodoxy among political theorists about the relation of religion and politics His argument is that a citizen may responsibly ground her political commitments on religious beliefs even if her only reasons for her political commitments are religious in nature His ideal of citizenship allows citizens to engage in politics without privatizing their religious commitments and yet does not license mindless and intransigent sectarianism An inherently controversial book that offers a substantial challenge to

political liberalism it will be read by students and professionals in philosophy political science law and religious studies and general readers seeking insight into the relationship between religious commitments and liberal politics **Scientific Explanation and Religious Belief** Michael G. Bases of Religious Belief, Historic and Ideal Charles Mellen Tyler, 1897 *The State of Religious Belief* Richard Bevan Braithwaite, 1927 *The Origin and Development of Religious Belief: Christianity* Sabine Baring-Gould, 1892 *Religion in Public and Private Life (Routledge Revivals)* Clarke E. Cochran, 2014-06-27 Religious crosses the spheres of both the private life and the public institution In a liberal democracy public and private interests and goals prove to be inseparable Clarke Cochran s interdisciplinary study brings political theory and the sociology of religion together in a fresh interpretation of liberal culture First published in 1990 this analysis begins with a reassessment of the nature of the public and the private in relation to the political The controversy over religion and politics is examined in light of such contested issues of political life as sexuality abortion and the changing nature of the family Clarifying a number of debates central to contemporary society this timely reissue will be of particular value to students with an interest in the relationship between religious society and politics *Religion in Liberal Political Philosophy* Cécile Laborde, Aurélia Bardon, 2017-05-26 Until now there has been no direct and extensive engagement with the category of religion from liberal political philosophy Over the last thirty years or so liberals have tended to analyze religion under proximate categories such as conceptions of the good in debates about neutrality or culture in debates about multiculturalism US constitutional lawyers and French political theorists both tackled the category of religion head on under First Amendment jurisprudence and the political tradition of *la cit* respectively but neither of these specialized national discourses found their way into mainstream liberal political philosophy This is somewhat paradoxical because key liberal notions state sovereignty toleration individual freedom the rights of conscience public reason were elaborated as a response to 17th Century European Wars of Religion and the fundamental structure of liberalism is rooted in the western experience of politico religious conflict So a reappraisal of this tradition and of its validity in the light of contemporary challenges is well overdue This book offers the first extensive engagement with religion from liberal political philosophers The volume analyzes from within the liberal philosophical tradition itself the key notions of conscience public reason non establishment and neutrality Insofar as the contemporary religious revival is seen as posing a challenge to liberalism it seems more crucial than ever to explore the specific resources that the liberal tradition has to answer it

Political and Judicial Rights through the Prism of Religious Belief Carl Sterkens, Hans-Georg Ziebertz, 2018-10-24 This innovative volume is focused on the relationship between religion on the one hand and political and judicial rights on the other At a time when the so called checks and balances that guarantee the vulnerable equilibrium between legislative executive and judicial branches of governance are increasingly under pressure this book offers valuable insights It presents empirical work that has measured young people's attitudes and explains the variety found across their views Readers will find answers to the question To what extent do youths in different countries support political and judicial human rights and what influences their attitudes towards these rights The political rights in this question include among others active and passive voting right the right to protest and the rights of refugees Judicial rights refer in general to the right of a fair trial and include principles like equality before the law the right to independent and impartial judgement the presumption of innocence the right to legal counsel and the privilege against self incrimination Expert contributing authors look at aspects such as religious beliefs and practices personal evaluation of state authorities and personality characteristics The authors discuss contextual determinants for attitudes towards political and judicial rights in both theory and empirical indicators Numerous helpful tables and figures support the written word This book makes an original contribution to research through the empirical clarification of factors that induce or reduce people's support of political and judicial rights It will appeal to graduates and researchers in religious studies philosophy or sociology of religion among other disciplines but it will also interest the general reader who is concerned with matters of human rights and social justice

Interpreting Interreligious Relations with Wittgenstein: Philosophy, Theology and Religious Studies, 2019-09-02 This volume argues that Wittgenstein's philosophy of religion and his thought in general continue to be highly relevant for present and future research on interreligious relations Spanning several sub disciplines from philosophy of religion philosophy of language comparative philosophy comparative theology to religious studies the contributions engage with recent developments in interpretation of Wittgenstein and those in the philosophy and theology of interreligious encounter The book shows that there is an important and under explored potential for constructive and fruitful engagement between these academic fields It explores and attempts to realize some of this potential by involving both philosophers and theologians and critically assesses previous applications of Wittgenstein's work in interreligious
