Michael Feener, 2013-10-21 This volume brings together a range of critical studies that explore diverse ways in which processes of globalization pose new challenges and offer new opportunities for religious groups to propagate their beliefs in contemporary Asian contexts Proselytizing tests the limits of religious pluralism as it is a practice that exists on the border of tolerance and intolerance The practice of proselytizing presupposes not only that people are freely choosing agents and that religion itself is an issue of individual preference At the same time however it also raises fraught questions about belonging to particular communities and heightens the moral stakes in involved in such choices In many contemporary Asian societies questions about the limits of acceptable proselytic behavior have taken on added urgency in the current era of globalization Recognizing this the studies brought together here serve to develop our understandings of current developments as it critically explores the complex ways in which contemporary contexts of religious pluralism in Asia both enable and are threatened by projects of proselytization

*Sovereignty and the Sacred* Robert A. Yelle, 2018-11-26 Sovereignty and the Sacred challenges contemporary models of polity and economy through a two step engagement with the history of religions Beginning with the recognition of the convergence in the history of European political theology between the sacred and the sovereign as creating states of exception that is moments of rupture in the normative order that by transcending this order are capable of re founding or remaking it Robert A Yelle identifies our secular capitalist system as an attempt to exclude such moments by subordinating them to the calculability of laws and markets The second step marshals evidence from history and anthropology that helps us to recognize the contribution of such states of exception to ethical life as a means of release from the legal or economic order Yelle draws on evidence from the Hebrew Bible to English deism and from the Aztecs to ancient India to develop a theory of polity that finds a place and a purpose for those aspects of religion that are often marginalized and dismissed as irrational by Enlightenment liberalism and utilitarianism Developing this close analogy between two elemental domains of society Sovereignty and the Sacred offers a new theory of religion while suggesting alternative ways of organizing our political and economic life By rethinking the transcendent foundations and liberating potential of both religion and politics Yelle points to more hopeful and ethical modes of collective life based on egalitarianism and popular sovereignty Deliberately countering the narrowness of currently dominant economic political and legal theories he demonstrates the potential of a revived history of religions to contribute to a rethinking of the foundations of our political and social order

**Dead But Not Lost** Robert Goss, Dennis Klass, 2005 The dead are still with us Contemporary therapists and counselors are coming to understand what s been known for millennia in most religions and in most cultures outside the Western milieu it s important to continue bonds between the living and the dead Taking these connections seriously Goss and Klass explore how bonds with the dead are created and maintained In doing so they unearth a fascinating new way to look at the origins and processes of religion itself Examining ties to dead family members teachers religious and political leaders across religious and secular traditions the authors offer novel ways of understanding grief and its role in creating meaning Whether for classes in comparative religion and death and dying or for bereavement counselors and other trying to make sense of

grief this book helps us understand what it means to feel connected to those dead but not lost     *Buddhist Poetry and Colonialism* Stephen C. Berkwitz, 2013-01-21 Many researchers have explored the impact of British and French Orientalism in the reinterpretations of Buddhism in South and Southeast Asia during the nineteenth and early twentieth centuries Less noticed however and infrequently discussed is the impact of Portuguese colonialists and missionaries upon Buddhist communities in the sixteenth and seventeenth centuries across Asia Stephen C Berkwitz addresses this theme by examining five poetic works by Alagiyavanna Mukaveti b 1552 a renowned Sinhala poet who participated directly in the convergence of local and trans local cultures in early modern Sri Lanka Berkwitz follows the written works of the poet from his position in the court of a Sinhala king through the cultural upheavals of warfare and the expansion of colonial rule and finally to his eventual conversion to Catholicism and employment under the Portuguese Crown In so doing Berkwitz explores the transformations in religion and literature rendered by what was arguably the earliest sustained encounter between Asian Buddhists and European colonialists in world history Alagiyavanna s poetic works give expression to both a discourse of nostalgia for the local religious and cultural order in the late sixteenth century and a discourse of cultural assimilation with the new colonial order during its ascendancy in the early seventeenth century Employing an interdisciplinary approach that combines Buddhist Studies History Literary Criticism and Postcolonial Studies this book yields important insights into how the colonial experience contributed to the transformation of Buddhist culture in early modernity
