Religious Influences On Health And Well Being In The Elderly:

Religious Influences on Health and Well-Being in the Elderly K. Warner Schaie, PhD, Neal Krause, PhD, Alan Booth, PhD, 2004-06-15 What makes the book's approach so captivating is that each chapter is written by a different researcher in the study of religion and health. These researchers are responsible for significant portions of the existing literature and methodologies found in this field today. The versatility of the book warrants special mention. It is effective as a survey of work that has already been done on this topic. At the same time it serves as a wellspring of ideas for new research. This work makes a valuable contribution to the present understanding of research on religion and health. It also serves as a road map to help chart directions for future endeavors in the field. **Sociology of Religion** This volume focuses on the ways in which religious institutions, religious practices, and religious organizations impact the health and well-being of older persons. Topics examined include the conceptualization and measurement of religion in late life, the relationship between religious coping and possible stress reduction, the role of forgiveness as an alternate mediator, how social class, gender, and race can influence the specific effect of religion, and religious institutions in a diverse aging society. Contributors include L. Chatters, K. Ferraro, L. K. George, E. Idler, S. McFadden, and K. Meador. **Managing Geriatric Health Services** Alice McDonnell, 2013. **Managing Geriatric Health Services** provides an overview of the many disciplines related to geriatric health administration as well as specialty topics in long-term care. Ideal for students studying geriatric health services administration as well as active professionals currently working in the field, **Managing Geriatric Health Services** thoroughly examines core topics such as administration, nursing, and rehabilitative therapies. It also covers specialty topics including spirituality, dementia, quality assurance, oral history, and ethical issues. This text examines the various jobs within the continuum of care from an administrative and management standpoint and also looks at the various roles or disciplines within long-term care and the specific challenges to each. With contributions from experienced professionals in the field, this book includes an entire section of interdisciplinary case study examples and reflection exercises. Individual chapters include learning objectives, key terms, chapter-specific case studies, and chapter summaries. **Key Features:** Discussion questions in each chapter engage the reader in learning and understanding the topics presented. Interdisciplinary case studies allow the reader to see the practical application of the concepts presented. Chapters are supported by current research from prominent experts in the field. A unique chapter on Oral Histories explores the aging process and the value of reminiscing. **Instructor Resources:** PowerPoint, Lecture Slides, Test Bank. **Methods in Religion, Spirituality & Aging** James W. Ellor, 2013-10-18. Since the 1971 White House Conference on Aging in the United States, the need to move from religiosity into new areas such as Spiritual Assessment and Spirituality has emerged. This movement has picked up momentum among scholars, particularly in terms of research in the area of Spirituality. While spirituality as a term is employed in many new studies, this term continues to defy the quest for a single definition and method. This book is divided into three sections. In the first, the authors reflect on the philosophical and theological issues.

presented by these terms from a variety of both cognate and practical methodological approaches The second section offers insights from the major professions of sociology psychology public health nursing and social work The final section offers insight and assistance to researchers and authors on specific religious traditions This book will be important for anyone working to develop such practical tools as spiritual assessment forms to those who engage in more formal scholarly investigation

The SAGE Handbook of Social Gerontology Dale Dannefer, 2010-09-14 This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia Australasia Europe and North America It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing Disciplinary overviews summaries of findings from key disciplinary areas within social gerontology Social relationships and social differences topics include social inequality gender and ageing the role of religion inter generational ties social networks and friendships in later life Individual characteristics and change in later life chapters in this section examine different aspects of individual aging including self and identity cognitive processes and biosocial interactions and their impact on physical and psychological aging Comparative perspectives and cultural innovations topics in this section include ageing and development ageing in a global context migration and cross cultural perspectives on grandparenthood Policy issues The final section examines some of the main policy concerns affecting older people across the world Topics include developments in social policy long term care technology and older people end of life issues work and retirement crime and older people and the politics of old age This will be essential reading for all students researchers and policy makers concerned with the major issues influencing the lives of older people across the globe

Social Structures and Aging Individuals K. Warner Schaie, Ronald P. Abeles, 2008-07-02 A useful reference book

Readers will find themselves returning to chapters again and again. **PsycCritiques** This is the 20th and final volume in the Societal Impact on Aging series. It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process. The editors therefore invited major organizers of and contributors to the 19 earlier volumes to review both the accomplishments and omissions of their efforts, discuss some timely new topics and provide guidelines for future research and theoretical explanations. The book is divided into five broad topics: health and wellbeing including the role of religion, personality and cognition; the impact of changes in technology and the work place; issues of socio cultural change and historical context; and the familial and societal contexts of aging. **New Frontiers in Resilient Aging** Prem S. Fry, Corey L. M. Keyes, 2010-07-29. A typically pessimistic view of aging is that it leads to a steady decline in physical and mental abilities. In this volume leading gerontologists and geriatric researchers explore the immense potential of older adults to overcome the challenges of old age and pursue active lives with renewed vitality. The contributors believe that resilience capacities diminishing with old age is a misconception and argue that individuals may successfully capitalize on their existing resources, skills and cognitive processes in order to achieve new learning, continuing growth and enhanced life satisfaction. By identifying useful psychological resources such as social connectedness, personal engagement and commitment, openness to new experiences, social support and sustained cognitive activity, the authors present a balanced picture of resilient aging. Older adults while coping with adversity and losses can be helped to maintain a complementary focus on psychological strengths, positive emotions and regenerative capacities to achieve continued growth and healthy longevity. **Historical Influences on Lives and Aging** K. Warner Schaie, PhD, Glen Elder, PhD, 2005-06-27. This book focuses on the ways in which the life course of individuals is affected by the historical contexts in which they live. Editors Schaie and Elder along with over twenty five contributors explore how historical events of varying degrees such as immigration, war, age, ethnicity and socioeconomic status can affect the immediate and long term life course. **Principles and Practice of Geriatric Psychiatry** Marc E. Agronin, Gabe J. Maletta, 2012-03-28. Many elderly patients suffer from psychiatric conditions that result from or are made worse by existing medical conditions. This new edition integrates clinical expertise needed to evaluate and treat psychiatric, medical and neurologic disorders in the older patient. Both scientific foundations of and clinical approaches to psychiatric disease are discussed by a range of experts who rely on evidence based clinical guidelines and outcomes data. Most chapters include case studies that illuminate the approaches to diagnosis and treatment. The book's five sections include basic principles of evaluation and treatment for specific disorders, appendices offering further insight into pharmacotherapy and neuroanatomic foundation of psychiatric diseases. **Handbook of Religion and Social Institutions** Helen Rose Ebaugh, 2007-10-23. Handbook for Religion and Social Institutions is written for sociologists who study a variety of sub disciplines and are interested in recent studies and theoretical approaches that relate religious

variables to their particular area of interest The handbook focuses on several major themes Social Institutions such as Politics Economics Education Health and Social Welfare Family and the Life Cycle Inequality Social Control Culture Religion as a Social Institution and in a Global Perspective This handbook will be of interest to social scientists including sociologists anthropologists political scientists and other researchers whose study brings them in contact with the study of religion and its impact on social institutions

professionals caregivers students and anyone working in home care or nursing home settings Social Structures, Aging, and Self-Regulation in the Elderly K. Warner Schaie, PhD, Laura L. Carstensen, PhD, 2006-07-06 This collection considers ways in which societal contexts influence aging by influencing self regulatory processes No one doubts that the social contexts in which individuals develop exert strong influence on life trajectories Those born into environments that provide high quality education supportive social relations and economic assets do better in old age than those born into environments bereft of such resources The extent of this influence however is only beginning to be revealed Recent research shows that life experiences influence basic brain structures e g the effect of musical training on neural organization and functions e g inflammatory processes and that social embeddedness may even protect against Alzheimer s disease Similarly education increasingly appears to have a real effect on neural integrity Thus societal contexts may not simply open or close doors for individuals but may influence self regulatory processes at the most basic levels of functioning Although social structures are generally seen as the independent variables that affect individual aging it is also possible to think of a lifetime development of self regulatory processes leading to behaviors in old age that can have impact on and modify societal structures Two parts of this book consider self regulation as the dependent variable asking how social contexts influence cognitive emotional and self regulatory processes The third part reverses the question treating self regulation as the independent variable and retirement and physical health as dependent variables In this part consideration is given to how the effectiveness of self regulation influences physical and economic outcomes in old age **Handbook of Sociology of Aging** Richard A. Settersten, Jr., Jacqueline L.
