Digital Media, Young Adults and Religion Marcus Moberg, Sofia Sjö, 2020-02-26. It has become increasingly clear that an adequate understanding of the contemporary processes of social, cultural, and religious change is contingent on an appreciation of the growing impact of social media. Utilising results of an unprecedented global study, this volume explores the ways in which young adults in seven different countries engage with digital and social media in religiously significant ways. Presenting and analysing the findings of the global research project *Young Adults and Religion in a Global Perspective* (YARG), an international panel of contributors shed new light on the impact of social media and its associated technologies on young people's religiosities, worldviews, and values. Case studies from China, Finland, Ghana, Israel, Peru, Poland, and Turkey are used to demonstrate how these developments are progressing, not just in the West but across the world. This book is unique in that it presents a truly macroscopic perspective on trends in religion amongst young adults. As such, it will be of great interest to scholars working in religious studies, digital media communication studies, sociology, cultural studies, theology, and youth studies.

Christian Political Activism at the Crossroads William R. Stevenson, 1994. This volume illuminates the discussion being carried on between the religious right with its concern for moral responsibility in politics and the issue-oriented activists who are concerned with how Christians in America address human rights and hunger issues. By bringing together both Christian scholars and activists from nearly all points of the political continuum, this book offers a rare glimpse into the reality of Christian diversity on the political task. The media often suggests a monist interpretation of Christian politics. This book shows both the vitality and plurality of Christian politics in America. The book covers the historical background, activist perspectives, organizational structures, and participant characteristics with essays by Frank Roberts, David O'Brien, Ruth Tucker, James Reichley, Delton Franz, Betty Coats, Lucille Taylor, Bruce Buursma, Robert Zwier, Allen Hertzke, James Guth, Lyman Kellstedt, Corwin Smidt, Stephen Monsma, and concludes with a suggestion of a new

medical systems Regulatory groups may identify the bias in AI but not the source of the bias making it difficult to determine who to hold accountable Lack of dataset and programming transparency can be problematic when AI systems are used to make significant decisions and as AI systems become more advanced questions arise regarding responsibility for the results of their implementation and the regulation thereof Research on how these applications of AI are affecting interpersonal and societal relationships is important for informing much needed regulatory policies Investigating the Impact of AI on Ethics and Spirituality focuses on the spiritual implications of AI and its increasing presence in society As AI technology advances it raises fundamental questions about our spiritual relationship with technology This study emphasizes the need to examine the ethical considerations of AI through a spiritual lens and to consider how spiritual principles can inform its development and use This book covers topics such as data collection ethical issues and AI and is ideal for educators teacher trainees policymakers academicians researchers curriculum developers higher level students social activists and government officials

Teenagers' Perspectives on the Role of Religion in their Lives, Schools and Societies. A European Quantitative Study Pille Valk, Gerdien Bertram-Troost, Markus Friederici, Céline Béraud, 2009 Religion is on the European agenda again The secularisation paradigm has lost its explanatory power and the newly coined term post secularism is used to describe the realisation that in the current social transformation religion cannot be ignored any longer The quantitative study presented in this book is part of the research effort by the REDCo project REDCo is the abbreviation for Religion in Education A contribution to Dialogue or a Factor of Conflict in Transforming Societies of European Countries The project brought together nine research teams from eight European countries England Estonia France Germany The Netherlands Norway

Russia and Spain The research involved interdisciplinary cooperation between specialists in the different academic fields of education religious education sociology political science anthropology psychology theology and religious studies The book offers valuable interpretations and inspirations on the question how the students in the 14 16 year age group in Europe see the ir relevance of religions for dialogue and conflict in their daily lives in the school environment and in society as a whole The young respondents of the quantitative study are clearly aware that the diversity of religious and non religious worldviews is the reality of the European contexts they have to manage within Most of them are convinced that religion must be addressed in schools as it is too important as factor in social life and for the coexistence of people from different cultural and religious backgrounds throughout Europe to be ignored
